TOBACCO LEAF PRODUCING REGIONS IN CHINA.

The "Foreign Trade Weekly", published by the Foreign Trade Association of China, Vol. 1. No. 15, gives the names of districts of various provinces in China where tobacco is regularly grown. Since we know tobacco leaf from American seed is grown only in Honan, Anhwei, and Shantung Provinces and in South Manchuria, it is to be assumed that the other districts mentioned grow native types of leaf. The list of growing districts as published does not state which type is grown in any one district but simply lists the districts as follows:
