FILE NO. 343
Chinn

To: Foodstuffs Division.
From: Mukden Office.
Subject: Weekly Report on Manchurian Cereals by Nisshin
Oil Mills.

Enclosed I am mailing a copy of a Weekly Report of the Nisshin Oil Mills at Dairen, giving a summary of prices on Manchurian agricultural products handled by them and quantities exported. This report was brought to our attention by Consul Langdon at Dairen.

It is rather difficult to get any information of this kind given in this bulletin and we are also in doubt as to how valuable information of this kind is to American business. We would kindly request that you glance over this bulletin and inform us whether regular reports along the lines shown would be of value.

Would it be of any use for us to incorporate any of these summaries in our weekly and monthly cables? On the last page are shown a summary of exports for the month. If these figures are of any use, we might incorporate them in our cables as received.

Your comments will be appreciated.

30e.

In reply to your reference 86 of May 15, I find that the report in question is being received regularly direct from Consul Langdon. The information is of considerable interest and value, but is hardly of sufficient importance to justify cabling. Thanking you, however, for your forethought in making the suggestion.

~~Ocean freight rates on grain from the Pacific Coast to China~~

Theo. D. Hammatt,
In Charge, Grain & Flour Section,
Foodstuffs Division.
