SIN WAN PAO

Sin Wan Pao Evening Edition

LARGEST CIRCULATIONS
BEST ADVERTISING MEDIUMS
THE SHUN PAO

Is the oldest and most widely read newspaper in China. Established in April, 1872, it enjoys the prestige of being the forerunner of public opinion and its editorial comments are widely quoted by foreign publications. It has an international circulation covering all parts of the world wherever there are Chinese citizens. Is the national paper of China, its daily circulation, 150,000 copies, being equally divided between Shanghai local and other parts of the country. Is the most influential among all newspapers in China.

An advertisement in the SHUN PAO is read by at least 150,000 families daily, in all parts of China. The SHUN PAO is the best medium for foreign advertising as only people of high purchasing power, like the readers of the SHUN PAO, buy high-class imported goods. The SHUN PAO renders expert services to foreign advertisers and offers advices in advertising matters.

Besides news, the SHUN PAO has other regular features. A movie supplement is a daily feature (including Sundays); the automobile supplement appears each Wednesday, while the rotogravure picture supplement appears every Monday and Thursday. No extra charge for advertising in each issue of the SHUN PAO newspaper carrying these features.

ALL RIGHTS RESERVED

October, 1934, Shanghai.
FOREWORD

THE last ten years have witnessed in China a steady growth in Advertising. Both the advertisers and the buying public have shown a keener interest in and appreciation of the various forms of advertising employed in China. As far as the results obtained by the advertisers here are concerned, the newspapers and magazines have proved to be one of the best mediums. The fact that a major portion of advertising appropriations for this market is allotted annually to leading publications points conclusively to their importance and effectiveness.

With this growth there is an increasing demand by the China advertisers, both in this country and abroad, and their advertising agents for more information concerning the publications and the localities in which they are published, in the form of a directory designed for easy, quick and dependable reference. To meet this demand, we have ventured to publish this directory.

This directory represents the result of many months' tireless investigation and compilation by the C.C.A.A. In compiling it we have kept in mind two major points: (1) the provision in a convenient yet comprehensive form of the type of information expected in a good newspaper directory; (2) the inclusion of a large number of what may be called "geographical notes". In addition, a complete index to the cities, newspapers and periodicals is included in order to make the book serviceable alike to advertisers, publishers, advertising agencies, and business men.

Limited facilities in some smaller interior cities have somewhat hampered our efforts in securing as complete information as may be desired, but in such cases, our own records which are periodically revised and kept fairly up-to-date, are resorted to for the necessary data.

We are extremely glad to offer this informative book to the public, and trust our initial efforts will meet with general approval.

We must gratefully acknowledge the liberal cooperation extended to us by various publishers as well as the generous support of the advertisers, all of which have helped to make possible the appearance of this book.

C. P. LING

China Commercial Advertising Agency,
Shanghai, October, 1934.
C. P. LING (Ling Chen-ping)

林振彬字吟秋

LING CHEN-PING, (林振彬) better known as C. P. Ling, was born in 1896 at Foochow, Fukien Province. He received his early schooling at the Anglo-Chinese College in his native city. In 1910 he successfully passed the competitive examination given by the Provincial Authorities and was sent the following year to Tsing Hua College, Peking to undergo a period of six years' preparatory education. After graduating from Tsing Hua in 1916, he was sent on the Boxer Indemnity scholarship to the United States for higher education.

In America he was advised by the President of Tsing Hua College, Dr. Y. T. Tsur, to enter the University of Rochester, New York. In 1918 he graduated from the said institution with highest honors. He was elected to both Phi Beta Kappa and Delta Upsilon. Mr. Ling finished his postgraduate work at Columbia, where he received his M.A., and later attended New York University. He specialized in Psychology and Advertising. In 1922, he returned to China and has since become one of the leading members of the advertising profession.

Mr. Ling has had extensive experience in advertising. From 1919 to 1922, he was connected with several advertising agencies in New York. From 1922 to 1926 he served in the Commercial Press, Ltd., as the manager of the China Publicity Company, and as manager of the Commercial Press, Hongkew Branch. In 1926 he resigned from the Commercial Press, Ltd., and founded the China Commercial Advertising Agency, of which he is now the proprietor and general manager. To-day this agency is in close touch with over 100 publications in China, and directs the advertising campaigns in this country for a number of well-known manufacturers, both local and abroad. During the last four years Mr. Ling has been a lecturer on advertising at the Downtown School of Commerce, University of Shanghai. In the years 1931-33, he served as a director of Bakerite Company, Fed. Inc., U.S.A. He is a member of the Shanghai Bankers' Club, American University Club, Pan-Pacific Association and other social organizations. Mr. Ling says that his ambition, as well as his motto is: "More Effective Advertising and Better Agency Work in China."—from "Who's Who in China" published by the China Weekly Review.
ANHWEI PROVINCE

Anhwei is situated between Honan and Kiangsu Provinces on the west, north and east, and is bounded on the south by Hupeh, Kiangsi and Chekiang. The province has a population of 20,198,840 inhabitants, in an area of 54,826 square miles, thus making 368 persons per square mile. The population is unevenly distributed, the ratio of population to area being highest in the north, and decreasing as one proceeds south.

The principal cities of this province are Anking, Wuhu, Pengpu, Fengyang, Hweichow, Taiping, Pochow, and Hofei.

The Yangtse River which divides the province into two parts, passes through a district which produces large quantities of tea, wheat, rice, and Chinese ink, known to the world as Indian ink. The tanning and selling of hides, and shipping of the agricultural products of this district make up the commercial activity of this province.

The hills which separate the two basins and those shutting in the Yangtse valley from the south are namely: the Hwang Shan, the Makin Ling and the Liang Shan which are denuded of their ancient forests, but their lower slopes have been cultivated and now grow excellent tea. The Hwo Shan, which divides the basin of the Yangtse from that of the Hwai, contains some very beautiful scenery, and in places these mountains rise to a height of 6,500 feet, though the average height is not more than 2,500 feet. The Hwang Shan to the south of the Yangtse is a very complicated range, especially in the neighbourhood of Hweichow, but its valleys are highly cultivated. This range at its greatest is nearly 6,500 feet. The whole province has a gentle easterly slope, abundant in rivers which are important not only as means of communication, but an important factor in irrigation.

Anking (安慶) is the capital city of the province of Anhwei with a population of 120,000. The city is a river port situated on the lower stretches of the Yangtse River. Its location makes it one of the more important ports on the River. The chief commercial activity of the city is the shipping of the agricultural products of the surrounding territory, with rice and wheat the two most important products shipped. Most of the imports come from Shanghai.
ANHWEI SHANG PAO (Anhwei Commercial Press) (安徽商報)
Published daily in the Chinese language.
Circulation: 500 locally.
Number of pages: 4.
Size of type-page: 14½" × 21½".
Number and size of columns: 6 columns in a page, each column measuring 14½" × 3½".

MIN SHENG PAO (People's Voice) (民聲報)
Established February, 1928.
Published every morning in the Chinese language including Sundays.
Circulation: 600 copies, of which 50½% is circulated locally.
Number of pages: one sheet of four pages; each page contains 4 columns; each column measures 5½" wide by 3½" deep.
Size of type-page: 8½" × 12½".

in equal rank with Wuhu. It is therefore one of the most flourishing cities in North Anhwei.

HUAN PEI SHIH PAO (North Anhwei Times) (皖北時報)
Established March, 1932.
Published every morning in the Chinese language including Sundays.
Circulation: 2,000 copies, of which 60½% is circulated locally and 40½% in outports.
Number of pages: 1 and one-half sheets.
Size of type-page: 8½" × 13½".
Number and size of columns: 6 columns in a page, each column measuring 8½" × 2½".

HOFEI (合肥) is an important city in North Anhwei and connected by four motor highways with the outlying districts. Hofei has a population of 70,000. Industrially, the city is quite prosperous. It is best known as the birthplace of Li Hung-chang, the great Viceroy.

MIN SHENG PAO (People's Voice) (民聲報)
Established May, 1932.
Published daily in Chinese.
Circulation: 1,500; outports 40½;
Number of pages: One sheet of 4 pages.
Size of page: 14" × 2½".
Size of column: 14½" × 3½".

WUHU (芜湖) with a population of 181,000, is the most important commercial port in the Province of Anhwei. It is located midway in the Yangtsze Valley, connected by waterways with Hofei in the north and with Suanchen in the south. All exports from the central and southern parts of the province, such as rice, cereals, silk, cocoons, tea, hemp, bamboo, timber, and eggs, pass through Wuhu for transportation.

WUHU KUNG SHANG JIH PAO (Wuhu Industrial & Commercial Daily News) (蕪湖工商日報)
Established October, 1916.
Published every morning in the Chinese language including Sundays.
Circulation: 3,280 copies, of which 45½% circulates locally and 55½% in towns and suburbs in Central and Southern Anhwei.
Number of pages: 2 sheets of 4 pages each sheet.
Size of type-page: 14½" × 19½".
Number and size of columns: Each page contains 5 columns and each column measures 14½" wide by 4½" deep.
CHEKIANG PROVINCE

CHEKIANG is a sea coast province with a population of 24,139,766. Its eastern boundary is on the Pacific Ocean, and the northern boundary borders on the province of Kiangsu. Fukien Province is on the south of Chekiang while Kiangsi and Anhwei are both to the west of the Province.

The Province covers an area of 36,680 square miles making it the smallest of China's provinces. The density of population is 657 to the square mile.

The south and west is mountainous, and is noted for some of the most beautiful scenery in China.

The principal cities of Chekiang are:

Hangchow  Tinghai  Kashing  Kinhwa
Ningpo  Taichow  Huchow  Fenghua
Wenchow  Shaohing  Nanzing  Haining

Chekiang is rich in rivers with the Chientang-kiang, rising in the Tayuling mountains and flowing across the Province from southwest to the northeast, through picturesque country and empties its waters into Hangchow Bay. The two rivers flowing from west to east are the Lin-kiang and the Ou-kiang. On the northern bank of the former is the city of Taichow, while Wenchow is on the latter.

The Chientang-kiang river is navigable above Hangchow by native crafts and small steamers. Larger steamers are able to reach Ningpo by sea. The whole of the northern section of Chekiang is a network of lakes, small creeks and canals along which native boats are used.

Brass and copper ware is manufactured at Kashing.

The Province is known to have deposits of coal and iron, but the mines are almost undeveloped. Silver, soapstone, alum, mercury, lime gypsum and salt are also exported.

Local dialects and Mandarin are spoken. The British consulate of Ningpo is administered by the British Consul-General in Shanghai.

Japan has a consular representative at Hangchow.

Both Roman Catholic and Protestant missions have important centres in the Province.

Roads were not thought to be necessary for this province as ample communication was provided by rivers and canals, but present roads connect the provinces of Kiangsi, Anhwei, Kiangsu and Fukien to the capital. The south-eastern section of the Province is at present being rapidly supplied with motor vehicles.

d

MAP OF CHINA SHOWING POSITION OF CHEKIANG PROVINCE

Area: 36,680 square miles.
Population: 24,139,766.
Important Cities: Hangchow, Kashing, Lanchi, Ningpo, Shaohing, Wenchow.
roads. The Shanghai-Hangchow Railway line will be eventually extended to Ningpo.

From Hangchow there is a line running down to Kinhwa and Lanchi. It is proposed to construct a line from Kashing, which lies in the north on the Shanghai-Hangchow Railway, to Wuhu, the port of Anhwei Province.

The northern section is the most productive area of the Province. Rice is cultivated throughout this district. Tea is grown in the south and in the hillier districts. A good quality tea is grown to the west of the West Lake. Chekiang is one of China's large silk producing provinces, so the mulberry tree is found everywhere. Cotton is cultivated along the bank of the Chientang-kiang.

Silk reeling and weaving is one of the leading industries of the Province and is carried on at Hangchow, where the finished article is made. Cotton mills are also established at Hangchow.

CHUKI (鈴軒) 70 miles south of Hangchow, lies on the Chekiang-Kiangsi Railway, recently built by the Chinese Government.

CHUKI KUO MIN SIN WAN
(Chuki Republican News)
Established August, 1913.
Published every morning in the Chinese language including Sundays.

Circulation: 760 copies, of which 340 copies are circulated locally and 330 copies are sent to outports.

Number of page: one sheet.

HANGCHOW (杭州) is the capital of the Province. It is situated on the left bank of the Chientang and at the southern terminus of the Grand Canal. Unfortunately the mouth of the Chientang is impassable to steamers owing to the existence of sand bars and a bore that sweeps up the river and makes navigation unsafe as far as the city. The city is a great centre for Buddhism and many fine temples are situated in it. Hangchow was opened to foreign trade in 1895, after the signing of the Shimonoseki Treaty. The reputation that the city had of being one of the finest in China was marred by unnecessary destruction during the Taiping Rebellion, but since then the prosperity of the city has gradually been built up, especially when the Shanghai-Hangchow Railway was completed. The city is now a manufacturing centre, and its industries include silk crepe and gauze weaving while fan-making is another important industry. A special kind of straw paper is manufactured on a large scale and with this paper and tin-foil, joss money is made. It is also largely used in the manufacture of fireworks.

The foreign Settlement extends for half a mile along the eastern banks of the Grand Canal, and is four miles from the nearest point of the city wall. The surrounding district is rich in agriculture; rice and silk of good quality are two of the
helpful products. An aerodrome is located on the outskirts of the city and a launch service is maintained on the upper reaches of the river and along the many connecting canals.

**KIANG MING WEN (Chekiang News)**
Established April, 1933. Published daily in the Chinese language.
Circulation: 2,500.
Number of pages: 6.
Size of page: 14 1/2" × 19 1/2".
Number of columns: 2.
Size of column: 14 1/2" × 9 1/2".

**THE MIN JIH PAO (Chekiang Daily News)**
Established March, 1912.
Published daily in the Chinese language.
Circulation: 6,000; 66% outport, 34% local.
Number of pages: 12.
Size of page: 14" × 20".
Number of columns: 14 × 5".
Setting facilities: Good.

**HANGHOU TU MIN SIN WANG (Hanghoo People's News)**
Established March, 1927.
Published daily in the Chinese language including Sundays.
Circulation: 12,000 copies, of which 4% circulates locally and 52% in outports.
Number of pages: 2 pages each sheet.
Size of type-page: 14" × 20 1/4".
Number and size of columns: 6 columns each measuring 11" × 3 1/2".

**PERIODICALS**

**FOU NU SUN KAN (The Ladies' Magazine)**
Established June, 1917.
Published every ten days in the Chinese language by the Chung Hwa Fu Nai Hsueh Soi (The China Women's Cultural Society).
Circulation: 3,000, of which 25% circulates locally and 75% in outports.
Number of pages: 22.
Size of type-page: 5 1/2" × 8 1/4".
Number and size of columns: 2 columns per page; each column measures 5 1/2" × 3 3/4".

Circulation: 2,000; 60% outport, 40% local.
Number of pages: 4.
Size of page: 14" × 21".
Number of columns: 4.
Size of column: 14" × 5 1/4".

Setting facilities: Good.

LANCHI (蘭谿) on the Chekiang-Kiangsi Railway is a growing commercial center in west Chekiang.

LANCHI MIN KUO CHOW PAO (Lanchi Republican Weekly) (蘭谿民國周報)
Established October, 1927.
Published every Wednesday in the Chinese language by the Lanchi Chamber of Commerce.
Circulation: 500 copies, of which 70% is circulated locally and 30% in outports. Read mostly by business people.

NINGPO (寧波) to the east of Hangchow, is situated at the confluence of the rivers Yung, Fenghua and Yuyao and is some twelve miles from the sea. Daily steamers leave the port for Shanghai. It is a treaty port, one of the first five of China, and was opened to foreign trade in 1842, by the British Treaty of Nanking. In 1840 the port was blockaded by the British and in the following year the city was peacefully entered. The restrictions imposed by the Chinese Government on Ningpo probably lost the city much trade, which was diverted to Shanghai, and

the subsequent raising of these restrictions came at too late a date for the port to compete against Shanghai, which is only 134 miles to the north. The main agricultural crops grown in the surrounding fertile district are tea, rice and cotton. Its industries are the manufacture of straw hats and mats, woodcarving, textiles and salt. There is also a remunerative fishing trade.

NINGPO MIN KUO JIH PAO (Ningpo Republican Daily News) (寧波民國日報)
Published every morning in the Chinese language including Sundays.
Circulation: 3,150 copies, of which 50% is circulated locally and 50% in outports.
Number of pages: 2 1/2 sheets of 4 pages each.
Size of type-page: 13 1/2" × 19 1/2".
Number and size of columns: 6 columns in a page, each column measuring 13 1/2" × 3 1/2".

NINGPO SHENG SAN JIH PAO (Ningpo Three-day Publication) (寧波三日報)
Established May, 1926.
Published every three days in the Chinese language.
Circulation: 900 copies, of which 90% is circulated locally and 70% in outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 8 1/2" × 13".
Number and size of columns: 6 columns, each measuring 8 1/2" × 2 1/4".

PINGHU (平湖) is an important market town about 60 miles south of Shanghai Population 123,000.

PINGHU SHANG PAO (Pinghu Commercial News) (平湖商報)
Established November, 1929.
Published every morning in the Chinese language including Sundays.
Circulation: 1,400 copies, of which 65% is circulated locally and 35% in outports.
Number of pages: one sheet of 4 pages.
Size of type-page: 9 1/4" × 13 1/4".
Number and size of columns: 6 columns, each measuring 9 1/4" × 3 3/4".

SHANGYU (上虞) is a market town, lying to the south of the Shanghai-Hangchow-Ningpo Railway.

SHANGYU SHENG SAN JIH PAO (Shangyu Three-day Publication) (紹興三日報)
Established May, 1926.
Published every three days in the Chinese language.
Circulation: 900 copies, of which 90% is circulated locally and 70% in outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 8 1/2" × 13".
Number and size of columns: 6 columns, each measuring 8 1/2" × 2 1/4".

SHAO PINGHUL JEN PAO (The Pinshuites) (小千鶴人報)
Established January, 1929.
Published every morning in the Chinese language including Sundays.
Circulation: 2,000 copies, of which 80% is circulated locally and 20% in outports.
Number of pages: one sheet of 4 pages.
Size of type-page: 9 1/4" × 13 1/4".
Number and size of columns: 6 columns, each measuring 9 1/4" × 2 1/4".
SHAOHING (紹興) to the east of Hangchow, lies on a canal connecting the city to the capital. Recently many desired reforms have taken place within the city. Rice is an important crop to this city, where the best samshu of China is manufactured. Population 668,500.

SHAOHING SIN WAN (Shaohing News) (紹興新聞)
Established April, 1920.
Published every morning in the Chinese language including Sundays.
Circulation: 12,700 copies, of which 85% is circulated locally and 15% in outports.
Number of pages: 2 sheets of 4 pages each sheet.
Size of type-page: 13¾" × 20".
Number and size of columns: 6 columns in a page, each column measuring 13¾" × 3¼".

WENCHOW (溫州) a treaty port in the south of the Province, was opened to foreign trade in 1877, but its trade has not developed to the extent that was anticipated. The adjacent district is productive, and rice, tea and rape seed are important crops which are mainly exported to Shanghai. A fine flavoured orange is grown in the district. Parasols are manufactured in the city. Silk is also an important industry. Population 720,000.

OUHAI MIN PAO (Ouhai People's News) (瓯海民報)
Established June, 1922.
Published every morning in the Chinese language including Sundays.
Circulation: 2,000 copies, of which 47% is circulated locally and 53% in outports.
Number of pages: one sheet of 4 pages.
Size of type-page: 14¾" × 20".
Number and size of columns: 8 columns in a page, each column measuring 14¾" × 2½".

WENCHOW SHANG PAO (Wenchow Commercial News) (溫州商報)
Language: Chinese.
Established November, 1931.
Published daily.
Circulation: 2,000; 30% outport, 70% local.
Number of pages: 2.
Number of columns: 12.
FUKIEN PROVINCE

FUKIEN Province is rectangular in shape with its eastern boundary on the Pacific Ocean. Kiangsi Province adjoins Fukien on the west, while to the north and south are the provinces of Chekiang and Kwangtung. The province covers an area of 46,332 square miles with a population of 14,329,594 giving it a density of population of 309 per square mile.

The important cities of the province are Foochow, Amoy, Santuao, Kiennin, Yenping, Chuanchow, Mamoii, Changchow, Hinghwa.

In the northern area the principal crops grown are tea, rice, bamboo shoots, olives, oranges, plums, potatoes, sugar cane and ground-nuts, and of these tea is the most important crop.

In Foochow there are several Chinese industries of which the most important are the manufacture of cotton cloth, soap, canned goods, condensed milk, lacquerware, glassware and towels. There is a Government arsenal established on Pagoda Island, which is equipped with efficient machinery. The leading native industry of the Province is the manufacture of paper from bamboo pulp. The southern districts of Fukien are still undeveloped.

The interior of the Province is not served with good road communication, but along the coast there is a fair road running from Changchow in the south to Foochow.

The Kiulang-kiang is the important river of southern Fukien, but it is only navigable for light draught boats. The Min-kiang in the northern section is only navigable for steamers as far as Pagoda Anchorage; however, junks take on cargo that is consigned to Foochow and native crafts are able to mount a considerable distance up the river. Steam launches now reach Shuikow and motor boats Yenping, Kiennin and Yangkow.

Fukien is one of China's southern provinces and the climate is sub-tropical. On the eastern coast the temperature rarely falls below 32 degrees, but in the mountainous north it can be very cold in winter. Foochow itself enjoys a temperate climate, except for the three summer months. In the south the rainy season is from February to June.

A railway not yet completed, at present runs from the mainland opposite to Amoy in the direction of Changchow and reaches the town of Kiangtungkiao.

In this province, coal, iron, copper, gold, lead and zinc are the chief minerals found. The coal is semi-anthracite and of a high quality, and has been located at Anki some fifty miles from Chuanchow. At Lungyen there is a rich iron and coal bed, but none of these mines have yet been properly developed.
to meet the local consumption. Lack of transport facilities also retards further operations.

The following countries have consular representatives stationed at Foochow:

America, France, Great Britain, Japan, and the Netherlands.

The following countries have consular representatives at Amoy:

America, France, Great Britain and Norway.

Language. — Foochow, Amoy and Shaowu are the principal dialects. Southern Mandarin is also spoken in some inland areas. The Foochow dialect is incomprehensible to those speaking only Mandarin, Shanghai, Ningpo or Canton dialects.

Protestant mission centres number thirty-two; there are many Roman Catholic centres as well.

AMOY (廈門) is a treaty port, 300 miles north of Hong-kong. Although it has a fine natural harbour, Amoy's trade has dropped considerably and it is no more an important exporting centre. It was one of the first ports to be visited by the western mariners.

AMOY is also a coastal city, lying between Foochow and Amoy.

CHUANCHOW (泉州) about seventy miles north of Amoy, was a great port of China seven centuries ago, and is a trading centre of some importance along the sea coast.

CHUANCHOW JIH PAO (Chuanchow Daily News) (泉州日報)
Established September, 1930.
Published every morning except Sundays in Chinese.

Circulation: 2,100; 40% outport, 60% local.
Number of pages: 1 sheet.
Publishers' Remarks: This is the only self-supported daily newspaper in Chuanchow.

FOOCHOW (福州), the capital of Fukien, is a treaty port with a large population of more than one million, and one of China's most beautiful cities, having many scenic spots in and around the city. It was first opened to trade in 1861, and is the most important trading centre of the Province.
HONAN PROVINCE

HONAN is located in the central part of China Proper, with an area of 67,954 square miles. Kaifeng is its provincial capital. There are altogether seven provinces surrounding its borders, Hopei, Shantung, Kiangsu and Anhwei on the east, and Hupeh, Shensi and Shansi on the west.

The climatic conditions in the south are mild. In the north it is cold in winter, and dust storms are experienced very often.

There is a good road from Loyang running southwards to Nanyang, from whence it turns south-westwards and crosses the border into Hupeh. In recent years a number of motor roads have been built with the provincial capital Kaifeng as the centre.

The Peiping-Hankow Railway divides the Province into two sections, the east and the west, while the Lunghai Railway runs from east to west. These two lines form a cross, intersecting at Chengchow. The Tao-Ching Railway from Taokow to Tsing-hwachen in the west crosses the Peiping-Hankow line at Sinhsin, the chief purpose of which is for the transportation of coal from the mines.

This Province is a very rich farming region. Cotton is the leading agricultural export, Nanyang being the leading cotton producing centre. Tobacco growing is confined more to the central and eastern part of Honan; Siangcheng and Chengchow are the largest centres. The quantity and quality of the annual harvest, however, depends for the most part on rainfall during the year. This province is therefore apt to suffer from drought.

Of its mineral products coal is the most important one. About one million tons of coal are sold each year. Honan anthracite is available both in Shanghai and Tientsin. Iron, tin, and silver-bearing lead are also found in the Province, but their working value is yet unknown.

CHENGCHOW (郑州) at the junction of Lunghai and Pinghan Railways, is a trading center of this province.

CHENGCHOW JIH PAO (Chengchow Daily News) (郑州日報)
Published daily in the Chinese language.
Circulation: 7,500; 70% outport, 30% local.
Number of pages: 2 sheets.

FUKOW (扶溝) is an inland city, 50 miles south of Kaifeng.

FUKOW SIX SHENG SHE (Fukow New Voice) (扶溝新聲社)
Established December, 1927.
Published monthly in the Chinese language.
Circulation: 500 copies, of which 80% is circulated locally and 20% is sent to outports. Read mostly by students.

MAP OF CHINA SHOWING POSITION OF HONAN PROVINCE

Area: 67,954 square miles.
Important Cities: Chengchow, Kaifeng, Loyang.
KAIFENG (開封) is the provincial capital, and an important station on the Lunghai Railway, 40 miles from Chengchow. It is famous as the former capital of old China.

DAI YUE JIH PAO (Great Honan Daily Press) (大豫日報)
Established 1932.
Published daily in the Chinese language.
Circulation: 1,500.

HONAN MIN KUO JIH PAO (Honan Republican Daily News) (河南民國日報)
Established February, 1930.
Published every morning in the Chinese language including Sundays.
Circulation: 5,000 copies.
Size of type-page: 14" × 19".
Number of pages: 2 sheets, 4 pages to each sheet.
Number and size of columns: 10 columns to the page, each column measuring 14" × 2".

HONAN MIN PAO (Honan Citizens' Press) (河南民報)
Established June, 1926.
Published every morning in the Chinese language including Sundays.
Circulation: 15,000 copies.
Number of pages: 2½ sheets, 4 pages to each sheet.
Size of type-page: 14¼" × 19¾".
Number and size of columns: 10 columns to the page, each column measuring 14" wide by 2" deep.
Publishers' Remarks: This publication is the leading paper of the Yellow River valley. Its circulation is spread throughout the country, read by the people in Shensi, Shansi, Shantung, Kiangsu and Honan provinces. It has gained the confidence of its readers for the reliability of its reports and the impartial character of its comments.

HONAN WANG PAO (Honan Evening News) (河南晚報)
Established since 1932.
Published every evening in the Chinese language including Sundays.
Circulation: 4,000, of which 80% is circulated locally and 20% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 9" × 14½".
Number and size of columns: 8 columns, each column measuring 9" × 1.8".

SIN HONAN PAO (The New Honan Press) (新河南報)
Established 1930.
Published every day in the Chinese language.
Circulation: 2,000, of which 65% is circulated locally and 35% is sent to outports.

SAN JIH SIN WAN SHEH (Three-day News) (三天新聞)
Established 1933.
Published every 3 days in the Chinese language.
Circulation: 1,500, of which 70% is circulated locally and 30% is sent to outports.
Number of pages: 1 sheet of 4 pages.

Number of pages: 1 sheet, 4 pages.

MENGHSIEN (孟縣) lies to the south of the Yellow River, and is an important trading market.

SIN MENGHSIEN CHOU KAN
(New Menghsien Weekly)
Established February, 1928.
Published every Monday in the Chinese language.
Circulation: 300 copies, of which 60% is circulated locally and 40% is sent to outports.
Number of pages: 4.
Size of type-page: 10\(\frac{3}{4}\)” \(\times\) 13\(\frac{1}{2}\)”.
Number and size of columns: 4 columns, each measuring 10\(\frac{3}{4}\)” \(\times\) 3\(\frac{1}{2}\)”.

WEISZE (尉氏) is an inland city, about 45 miles from Kaifeng.

WEISZE MIN PAO (Weisze Citizens’ Press) (尉氏民報)
Established May, 1932.
Published every morning in the Chinese language including Sundays.
Circulation: 300 copies, of which 70% is sent to outports. Read mostly by teachers of village schools and farmers.

Publishers’ remarks: This publication is not for sale; it is intended for the promotion of the welfare and knowledge of the country people and the propagation of the doctrines of the Kuomintang.
HOPEI PROVINCE

HOPEI covers an area of 115,830 square miles. It is bounded to the north and north-west by the provinces of Chahar, Jehol and Shansi, and separated from them by the Great Wall of China; to the west and south by the provinces of Honan and Shantung; its eastern boundary lies along the sea coast of the Gulf of Chihli. It possesses a population of 38,905,695 the density of which is 335 to the square mile.

The climate of the province is extreme, being very hot in the summer and very cold in the winter. Little rain falls excepting in July and August, and the wind storms and dust storms are very disagreeable.

Transportation is well provided for in this province with Peiping as the centre. There are five railways, all radiating from Peiping. They are the Peiping-Kalgan, Peiping-Tungchow, Peiping-Mentokou, Peiping-Mukden and Peiping-Hankow Railways. The Tientsin-Pukow Railway leaves the province at Tehchow. The Chengtai Railway enters the province from Taiyuan, provincial capital of Shansi, and meets the Peiping-Hankow Railway at Shihchiachwang. Now an air service is operated three times a week between Shanghai and Peiping.

The province being a fertile plain, farming is extensively carried on over most of the territory. Among the crops grown are kaoliang, millet, wheat, cotton, beans, ground-nuts, hemp, rice, tobacco, potatoes, corn, sesame and buckwheat. Splendid fruits and walnuts are grown too.

Bristles, hides, skins, and wool are leading exports. Along the coast the fishing industry is very important. The Changlu Salt Works produce annually millions of piculs of salt to supply the needs of the northern provinces.

The mountains are full of both hard and soft coal. The best coal mines are owned by the Kailan Mining Administration, which is situated in the Kaiping district. The type of coal mined here is bituminous, and the mines have a daily output of 14,000 tons. Iron, silver, and gold are also mined.

Peiping, full of historical scenes and memories, is the most interesting and splendid capital city in the world, to which flocks of tourists go. Tientsin, main port of north China, is the centre of foreign trade in the province. It serves as the outlet for the export of wool, furs and hides from Mongolia and other northern provinces.
PEIPING (北平) since the establishment of the National Government of China at Nanking, this city has lost a good deal of its political importance, enjoyed during the past three centuries. Its name was then changed from Peking to Peiping. It is the northern terminus of the Peiping-Hankow Railway, southern terminus of Peiping-Mukden Railway, and eastern terminus of Peiping-Suiyuan Railway, which penetrates far into Inner Mongolia. It has a population of 1,520,188.

CHUAN MIN PAO (The Mass) (全民報)
Established August, 1928.
Published every morning in the Chinese language including Sundays.
Circulation: 12,600 copies.
Number of pages: 2 sheets of four pages each.
Size of type-page: 14” × 19”.
Number and size of columns: 10 columns to a page, each column measuring 14” × 1½”.

HWA PEI JIH PAO (The North China Press) (華北日報)
Established January, 1929.
Published every morning in the Chinese language including Sundays.
Circulation: 13,000 copies, of which 47% is circulated locally and 53% is sent to outports.

Published every evening in the Chinese language including Sundays.
Circulation: 50,000.
Number of pages: 3 sheets, 4 pages to each sheet.
The Most Popular Paper in North China

THE SOCIAL WELFARE
(YIH SHIH PAO)

Established 1915
1 VIA TRIPOLI, ITALIAN CONCESSION
TIENTSIN, CHINA

As the leading daily newspaper of North China entirely independent in its views and criticisms, the "Social Welfare" is by far the more influential than any other newspapers in the district.

ADVERTISING RATES ON APPLICATION
Hunan, covering an area of 83,398 square miles, is located in Central China. The whole province on the northern boundary is adjacent to Hupeh Province; Kiangsi runs the full length of the eastern boundary; Kwangsi and Kwangtung occupy equal sections of the southern boundary, and Kweiichow forms the greater part of the western boundary with a small portion of Szechwan Province adjoining in the extreme north-west.

It has a population of 40,529,988. The density of population per square mile is 486.

The climate of the province is moist. The summer months are both warm and damp, whereas the winter months, due to the prevailing humidity and icy winds, are very cold.

Excepting the plain surrounding Tungting Lake and the valleys of the Yuen and Siang rivers, all of the province is hilly. These rivers all flow northward into Tungting Lake, which is connected with the Yangtze by several channels. Hunan in the past has largely depended on its waterways for transportation and communication.

During recent years, the provincial government has devoted itself to constructing motor roads. There is a fleet of omnibuses on the roads radiating from Changsha. The Hankow-Canton Railway remains unfinished, and it has only been constructed as far south as Chuchow. From Chuchow starts the Chuchow-Pinghsiang Railway, running eastward to the collieries of Pinghsiang in Kiangsi.

The fertility of Hunan is shown by the proverb "a good harvest in Hunan means plenty for the whole of China". The hillsides are all terraced and farmed, and three crops are grown each year. Tea is Hunan's most famous product. Other crops are hemp, cotton, rice, tobacco, beans, wheat, ramie, sesamum, and vegetable oils.

Hunan produces more than 300,000 tons of coal annually; the coal fields embrace 21,100 square miles in the southeastern part of the province. Antimony is the chief metal that has been mined. Lead and zinc deposits are found in the south, while tin mines are found close to the Kwangtung border. Gold washing is carried on in various parts of Hunan, but the amount secured barely pays for the labour.

There are two consular representatives for Great Britain and Japan at Changsha, provincial capital of the province.
CHANGSHA (長沙) the capital of Hunan, is situated on the right bank of the Siangkiang, in the east of the Province. The city is a treaty port opened to foreign trade in 1904. Changsha is situated in a fertile valley where rice is one of the main crops grown and vegetables are also cultivated on a large scale. Changsha is the main market for antimony in Hunan and the city is the supplier of about three-quarters of the world’s demand. Changsha is perhaps the cleanest city in China. Within the walls of the city are fine buildings, which include temples, schools, the Hunan-Yale Medical Hospital and the Hunan University. The latter two institutes are without the city walls, the University being situated on the slopes of the Yen-lo-shan. Communication is provided by the Siangkiang, which is a tributary of the Yangtze; a railway line connects Changsha to Wuchang. Cotton mills, cement works, a glass factory, a flour mill and a fire-cracker factory are established at Changsha. Fire-crackers are exported as far as Singapore.

CHANGSHA SZE MIN JIH PAO
(Changsha Citizens’ Daily News)

Established August, 1930.
PUBLISHED EVERY MORNING IN THE CHINESE LANGUAGE INCLUDING SUNDAY.
Circulation: 5,000, of which 60% is circulated locally and 40% is sent to outports.
Number of pages: 2 sheets; 4 pages to each sheet.
Size of type-page: 14 x 22.”
Number and size of columns: 12 columns, each column measuring 14” x 1½”.

PUBLISHER’S REMARKS: This publication is famous for its daring critical articles and has been on many occasions warned by the local authorities.

HUNAN CHUNGHSHAN JIH PAO
(Hunan Chungshan Daily News)

Established July, 1929.
PUBLISHED EVERY MORNING IN THE CHINESE LANGUAGE INCLUDING SUNDAYS.
Circulation: 9,000.
Number of pages: 2 and a half sheets, each sheet containing 4 pages.
Size of type-page: 13½” x 19½”.
Number and size of columns: 10 columns, each column measuring 13½” x 2”.

PUBLISHER’S REMARKS: This publication is equipped with printing machinery, the publication produces well-printed copies, while its circulation is the biggest in this city and its reports are accurate and fast.

NAN YUE JIH PAO (Nan Yue Daily News)

Established April, 1931.
PUBLISHED DAILY.
Circulation: 3,000; 60% outport, 40% local.
Number of pages: 4.

WAN WAN PAO (Evening News)

Language: Chinese.
Established April, 1931.
PUBLISHED DAILY.
Circulation: 5,000; 60% outport, 40% local.
Number of pages: 2.
Size of page: 9½” x 12 1/5”.
Number of columns: 11.
Size of column: 9½” x 1¼”.

CHANGTEH (常德) situated on the north bank of the Yuan river, lies to the west of Tungting Lake in the centre of the northern district. It is of some importance as the distributing centre of wood-oil, beans and vegetable tallow, which come from the western districts. The question of making Changteh an open port has been considered by the Chinese Government. Officials visited the city in 1906 and 1915 to enquire into ways and means of bringing about this project, but as yet the port is still closed and only remains open to vessels under the Inland Water Navigation rules. It is the market centre for goods coming from the provinces of Szechwan, Hupeh and Kweichow.

TAH KUNG PAO (Great Justice Press)

Language: Chinese.
Established Sept. 1915.
PUBLISHED DAILY.

Publishers’ Remarks: This publication has experts in its editorial department, and is equipped with a radio receiving set supplying most up-to-date news. Its printing is of fine quality and its circulation has been growing steadily.

TAOYUAN (桃園) lies on the Yuan river to the south of Changteh. Steamer services connect these two cities.

TAOYUAN TUNG SHU PAO (Taoyuan Simple Language Press) (桃園通俗報)
Established June, 1928.
Published daily in the Chinese language except Sundays.
Circulation: 500, of which 95% is circulated locally and 5% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Number of columns: 4 columns.
HUPEH PROVINCE

HUPEH embraces an area of 71,428 square miles with a population of 28,616,576. Its southern boundary is formed by the provinces of Hunan and Kiangsi; Anhwei lies on the east; Szechwan and Shensi are on the west, the latter also forming part of the northern boundary, which is completed by Honan Province. Wuchang is the provincial capital.

The Yangtze flowing from west to east is regarded as the highway for all traffic passing through the Province. Though 600 miles from the sea, Hankow is accessible to ocean steamers for eight months of the year. Between Hankow and Ichang the lower river ships are able to ply in the high water season, but winter navigation is very difficult and is carried on primarily by the shallow draught small steamers. Small craft is used on the Han River, which is of some importance as a trade route.

The Peiping-Hankow Railway terminates at Hankow after a run of 755 miles. The Canton-Hankow Railway has not as yet been completed and only runs as far south as Chuchow in Hunan. A daily air-mail from Shanghai to Hankow has been in operation for nearly four years, and has been successfully extended into Szechwan Province.

The soil of the province is fertile, especially in the Han Valley. The agricultural products are cotton, rice, wheat, vegetable tallow, tea, silk, flax, and hemp. Hog bristles and hides of the cow and water buffalo form one of the important exporting trades of the province.

The important mineral of this province is iron, the mines of which are situated at Tayeh, and coal mines are found in the vicinity also. About 700,000 tons of iron ore and 100,000 tons of coal are mined annually. Gold washing is an old industry of Shasi and Ichang.

Consulates of America, Belgium, Denmark, Finland, France, Germany, Great Britain, Italy, Japan, Netherlands, Norway, Portugal and Sweden are established at Hankow. France, Great Britain and Japan have their consulates also established at Ichang. The British consulate of Shasi is under the jurisdiction of the British consulate at Ichang.

HANKOW (漢口) lies at the confluence of the Han River with the Yangtze. A regular steamer service is maintained between this port and Shanghai. Hankow is the principal port of the Yangtze and in the central position of all the provinces of China. It is a treaty port opened to foreign trade in 1862 and
from that date it rapidly developed as an importing and 
ex-orting centre for the interior of China. The manufacture of 
brick tea originally brought Hankow into prominence as a trad-
ing centre, but lately the decline of the tea trade, arising partly 
from the economic plight of Russia, which used to be the 
principal customer, and partly from Britain's preferential tariffs 
in favour of Ceylon, may be put down as one of the reasons for 
the falling off of trade in general at Hankow. There is a large 
foreign community resident at Hankow and the majority of the 
larger business houses of Shanghai, banks and shipping lines 
have their branches and agencies established at the port. The 
Hankow Bund is renowned, and is one of the finest in the Far 
East. Flour and cotton mills are established; there are some 
large cotton packing establishments. Hankow is essentially the 
trading port of the Province and Wuchang the industrial city. 
Since the disastrous floods of 1931 a retaining wall has been 
built along the Bund frontage.

CENTRAL CHINA POST, THE
Published every morning except 
Sundays in the English language.
Circulation: 1,100.
Number of pages: 14-16.
Size of type-page: 15" × 22".
Number of columns: 7, width 2".

STRESSES IN STATICALLY 
INDETERMINATE STRUCTURES

By

H. YU

Professor of Structural Engineering,
NATIONAL WUHAN UNIVERSITY, CHINA

253 pages, 6" x 9" $2.00, U.S. gold

THIS book treats various higher structures 
with methods that are original and are 
not generally found in European and American 
books. On the hand, the methods used 
are quite simple, and the results obtained are 
very accurate. It is the book for all the 
structural engineers. Copies of the book can 
be obtained from

H. YU

NATIONAL WUHAN UNIVERSITY
WUCHANG, HUPEH, CHINA
IT'S THE RESULT THAT COUNTS!

Since 1926 we have served a large number of advertisers in this country, both foreign and Chinese, including some of the largest manufacturers in Europe, America and other countries. During these years they have continued and are still continuing to patronise our service because they are pleased with the results they get.

The copy, layout and art work prepared by us have helped those advertisers to sell their goods in China, particularly to the Chinese. Our judgment in selecting and recommending the right media and appeals based on our intimate knowledge of the market and the people has resulted in bringing our clients the maximum return on their advertising appropriation.

We are here to serve, to get the result for those who are keenly interested in this potential market. We welcome any inquiry for any information relative to the advertising and merchandising problems in China.

Circulation: 3,000.

CHENG WC CHOW KAN (The Administration Weekly) (政務週刊)
ICHANG (宜昌) lies at the commencement of the rapids and gorges of the Yangtze. It is a treaty port, which was first opened to foreign trade in 1877. Cargo proceeding higher up the river than Ichang has to be transferred to a smaller type of boat. This is in the case of native craft only as the steamers on the upper Yangtze run are specially built to mount the river as high as Chungking. There is an aerodrome at Ichang.

KCO MIN JIH PAO (People’s Daily News) (國民日報)
Established 1932.
Published every morning in the Chinese language including Sundays.
Circulation: 1,500.
Number of pages: 1 sheet of 4 pages.

Size of type-page: 14¼” × 19½”.
Number and size of columns: 12 columns each measuring 19¼” × 1½”.

Number of pages: 1 and half sheets —6 pages.

KING PAO (The Hupshu Press) (荊報)
Language: Chinese.
Established July, 1930.
Published daily.
Circulation: 3,000; 60% outport, 40% local.
Number of pages: 4.
Size of page: 13” × 18”.
Number of columns: 12.
Size of column: 3” × 1¾”.
Publishers’ Remarks: Supplement on every national memorial day.
KANSU PROVINCE

KANSU, with an area of 125,483 square miles, is shaped like a frying pan, with the handle stretching northwest towards Sinkiang, along which the silk route runs. The southern part of its northern section is separated from Chinghai by the Richthofen mountains; on the west is Sinkiang. Ninghsia is the neighbouring province on the north-eastern boundary: while in the south and east are Szechwan and Shensi respectively. It has a sparse population of 7,422,818, the density of population being 59 per square mile.

Kansu is even more arid than Shensi, and has extremes of heat and cold.

Western and southern Kansu is very mountainous with many lofty ranges extending eastward from the Kuenlun and Altyn-Tagh systems. Railway transportation has not developed yet, therefore, highways are resorted to for transportation and communication. The four main roads radiating from Lanchow are (1) to Urumchi by the silk route for transporting silk to Central Asia and Europe in ancient times; (2) to Sining and on to Lhasa in Tibet; (3) to Sian, capital of Shensi; and (4) to Chengtu in Szechwan. All the rivers are not suitable for navigation.

Being mountainous in nature, Kansu is not a suitable place for agricultural development with the exception of a few districts. The chief crops are wheat, fruit, indigo, tobacco, barley and vegetables. Sheep rearing is the occupation of those living in the hilly districts.

Kansu is rich in coal. But lack of transportation facilities and capital is accounted the reason why the mines remains undeveloped. Copper is mined seventy miles north of Lanchow. Salt is available from salt lakes.

PINGLIANG (平涼) is an important trading centre in the mountainous region. A great overland route connects with the important cities in the neighbouring province of Shensi.
TIENSHUI (天水) lies at the commencement of the Wei river passing through a loess plateau of varying height down into Shensi.

LUNGNAH MIN SHENG JIH PAO (Lungnan People's Voice) (龍南民聲報) Established February, 1932. Published every morning in the Chinese language. Circulation: 600, of which 20% is circulated locally and 80% is sent to out-districts. Read by all classes. Number of pages: 1 sheet of 2 pages. Size of type-page: 8 1/4" × 16". Number and size of columns: 5 columns, each measuring 8 1/4" × 3 1/4".

TSIUCHWAN (酒泉) is another name for Suchow (酒州) only 30 miles from the last gate in the Great Wall. The valley surrounding it is very fertile.

BIEN KWAN CHEN SHI (The Border Morning Ray) (邊關晨曦) Established May, 1932. Published every Friday in the Chinese language. Circulation: 400—read mostly by officials and scholars. Number of pages: 1 sheet of 2 pages. Size of type-page: 9 1/2" × 13". Number and size of columns: 3 columns, each measuring 9 1/2" × 3 1/4".
KIANGSI PROVINCE

KIANGSI is a province of 27,563,410 population, with an area of 69,498 square miles. Its northern boundary is formed by the Yangtze. On the northwestern frontier stands the Lu Shan, separating the Province from Hubei. The western boundary is the mountainous country which divides it from Hunan. Kwangtung borders the south of the Province, and the eastern frontier adjoins the provinces of Fukien, Chekiang, and Anhwei.

The summer months of this province are very hot and the atmosphere is humid, especially in the low-lying country. But on the beautiful Lu Shan near Kiukiang there is the famous sanatorium and summer resort of Kuling. In the north of the Province it is often very cold in winter, but further south the climate is more temperate, as the southern section lies in the subtropical belt.

Roads are being developed quickly. A road from Nanchang runs north-eastwards to Kingtehchen, where it forks to Anking in the north and to Nanking in the north-east. A road passing Nanchang on the west and skirting the western borders of the Poyang Lake, runs to Kiukiang and further proceeds to Anking after crossing the Yangtze.

There are two railways in the Province. The Nanchang-Kiukiang Railway and the Pinghsiang-Chuchow Railway. The former covers a distance of only 80 miles at present and it is hoped to extend it southwards to Canton; the latter purely serves for coal transportation.

The Yangtze is certainly the main means of communication between Kiangsi and other provinces along the River. The Kan Kiang is regarded as the highway of the Province. Poyang Lake is very similar to Tungting Lake in Hunan, and during the high water season in summer it is far larger than in winter.

The Kan valley is of great fertility. Keemun tea is the famous product. Rice, cotton, wheat, tobacco, sugar, hemp, and beans are other important products. Bamboo is grown and paper is made from it.

The porcelain industry of Kingtehchen is one of the oldest industries of the Province. The value of the chinaware manufactured there annually is about four million dollars. Fans are also manufactured and form a leading export from the south. The manufacture of soap is growing to be an important industry. Coal is mined near Pinghsiang and copper mined at Kanchow.

British and Japanese consulates are established at Kiukiang.
KIUKIANG (九江) the only treaty port of the Province, is situated on the Yangtze and at the northern end of the Kiukiang-Nanchang Railway. The port was opened to foreign trade in 1862, and although the city suffered from the Taiping Rebellion, with the establishment of a foreign settlement its prosperity began to return. The foreign settlement has been controlled by Chinese authorities since 1927. Tea is an important export of this port, which was originally opened to develop the trade of this commodity. Hankow, however, is now the chief exporter of tea. The surrounding district is fertile; rice, cotton, tobacco and ramie are some of the principal crops. A match factory, electric power house, the Kiushing Spinning and Weaving factory and the Kiukiang Customs Lights Repair Yard are among the larger concerns of this port.

NANCHANG (南昌) the capital of the Province, is on the right bank of the Kan River in the centre of a fertile plain. During the Han period the city was known as Yuchang. The city suffered greatly during the Taiping Rebellion. There are many canals joining it to Poyang Lake and the towns in the near vicinity. The city lies at the terminus of the railway from Kiukiang. Small steamers are able to reach the city all the year round. During the past two years many good roads have been built in the province with Nanchang as the center, so that the city is now greatly modernized.
DAH KWANG PAO (The Great Light) (大光华)
Established March, 1933.
Published every morning in the Chinese language including Sundays.
Circulation: 3,100, of which 68% is circulated locally and 32% is sent to outports.
Number of pages: 2 sheets of 4 pages each sheet.
Size of type-page: 14” x 27”.
Number and size of columns: 20 columns, each column measuring 14” x 2½”.
Feature pages: Arts and Literature Page every Sunday and Children’s Page every Monday.
Publishers’ Remarks: The novelty and distinctive printing coupled with special attention in editing makes this publication the best ever published in the city of Nanchang. It is praised by its readers and its circulation is increasing daily.

Kiangsi Wan Pao (Kiangsi Evening News) (江西晚报)
Established Sept. 1927.
Published every evening in the Chinese language including Sundays.
Circulation: 3,000, of which 70% is circulated locally and 30% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 13½” x 19”.
Number and size of columns: 20 columns, each column measuring 13½” x 2”.
Publishers’ Remarks: The news published in this paper is one day ahead of other morning papers. It is the only evening paper in Kiangsi Province. It is a valuable advertising medium.

NANCHANG SHANG PAO (Nanchang Commercial Daily News) (南昌商业日报)
Established August, 1929.
Published every morning in the Chinese language including Sundays.
Circulation: 8,520.
Number of pages: 2 sheets of 4 pages each sheet.
Size of type-page: 14” x 20”.
Number and size of columns: 8 columns, each column measuring 14” x 2½”.
Publishers’ Remarks: This publication has its special staff in charge of printing and editing and has special correspondents in Nanking and Shanghai. Its reports are fast and accurate.

NANCHANG SIN WAN JIH PAO (Nanchang Daily News) (南昌新闻日报)
Established April, 1928.
Published every morning in the Chinese language including Sundays.
Circulation: 5,000, of which 67% is circulated locally and 33% is sent to outports.
Number of pages: 2 sheets, 4 pages to each sheet.
Size of type-page: 14½” x 19⅞”.
Number and size of columns: 8 columns, each measuring 14½” x 2¼”.
Publishers’ Remarks: This publication is the only paper of recognized value and it has besides both telegraphic and wireless news reports, its own staff of correspondents in Nanking, Tientsin, Shanghai, Hankow and Canton. It has enjoyed the confidence of the public and is the leading paper in Nanchang.
KIANGSU PROVINCE

KIANGSU is located on the central sea-board of China with a total area of 38,610 square miles. Its north is bounded by Shantung; on the west are Honan and Anhwei; Chekiang and the Great Tai-ho combine together to form the southern boundary; the whole of the east is bounded by the China Sea. Chinkiang is the provincial capital.

It has a population of 34,624,433. The density of population is 863 per square mile, this province being one of the most densely populated in China.

Except in January and February, the winter months are mild. The summer months are hot and damp, but thunderstorms clear the atmosphere after oppressive heat. Autumn is the best season. The climate in the north is drier than that of the south.

Kiangsu is the best watered province in China. Nearly every city in this province is served by launches. The Grand Canal is a very important waterway, while the Whangpoo River is the largest and busiest of all.

Besides macadamized roads connecting all important cities, there are five railways, namely, Shanghai-Woosung Railway, Nanking-Shanghai Railway, Tientsin-Pukow Railway, Lung-Hai Railway and Shanghai-Hangchow Railway. The importance of this province commercially, industrially and financially, is partly attributed to the network of transportation and communication spreading over the whole territory.

Since most of the Province was formed by the silt brought down by the Yangtze and the Yellow River, the Province is very fertile, especially the southern part. Cotton, sesame, beans, groundnuts, silk, hemp and vegetables are among the important crops grown.

Industrially and commercially, Kiangsu is one of the wealthiest provinces. In Shanghai there are a large number of factories. The principal Chinese manufactures include cotton, silk, silver, canned goods, tobacco, matches, oil, paper and leather.

The following countries have governmental representatives and their staff at Shanghai:—America, Austria, Belgium, Brazil, Chile, Cuba, Czechoslovakia, Denmark, Finland, France, Germany, Great Britain, Italy, Japan, Netherlands, Norway, Portugal, Spain, Sweden, and Switzerland.

Area: 38,610 square miles.
Population: 34,624,433.
Important Cities: Chinkiang, Huchow, Nanking, Nantung, Shanghai, Soochow, Tsingkiangpu, Wusih.
The following countries have representatives at Nanking:—
America, Germany, Great Britain, and Japan. British consular representation at Chinkiang is administered by H. M. Consul at Nanking. Japan has a consul at Soochow.

CHANGCHOW (常州) is an important trading city on the Shanghai-Nanking Railway, midway between Nanking and Shanghai. Its fine craftsmanship for comb-making has won a national-wide fame for Shanghai. Its fine craftsman ship has the Sun of Chinkiang is administered by H. M. Consul at Nanking. Japan has a consul at Soochow.

CHANGCHOW KON PAO (Changchow Steel News) (常州鋼報)
Established December, 1929.
Published every 3 days in the Chinese language.
Circulation: 2,500, of which 70% is circulated locally and 30% is sent to outports.
Number of pages: 1 sheet of 2 pages.
Size of type-page: 13 1/2'' x 20''
Number and size of columns: 6 columns, each measuring 20'' x 21/2''.

HUENGSAN JIH PAO (Wutsin Commercial Daily News) (武進新華日報)
Established July, 1927.
Circulation: 5,000.
Number of pages: 4.
Number of columns: 8.
Size of columns: 12'' x 5''.

CHANGSHU (常熟) lying to the south of the Yangtze River, is famous as the most important rice-producing centre of this province.

JIN PAO (The Changshu Harp) (琴報)
Established May, 1916.
Published every morning in the Chinese language including Sundays.
Circulation: 2,300, of which 65% is circulated locally and 35% is sent to outports.

CHINKIANG (鎮江) on the southern bank of the Yangtze, is forty-five miles east of Nanking. It is the capital of the Province and a commercial centre of some importance.

CHINKIANG SHANG PAO (Chinkiang Commercial News) (鎮江商報)
Established October, 1932.
Published daily in the Chinese language.

WUTSIN SHANG PAO (Wutsin Commercial News) (武進商業日報)
Established April, 1927.
Published every morning in the Chinese language including Sundays.
Circulation: 2,500, of which 85% is circulated locally and 15% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Number and size of columns: 8.

 Publishers' Remarks: The object of this publication is for the development of commerce; it is composed to be a well-equipped newspaper. Its news reports are fast and accurate; its circulation is steadily growing.

KIANG SING JIH PAO (The Voice of Chinkiang) (江聲日報)
Established March, 1924.
Published every morning in the Chinese language, including Sundays.
Circulation: 4,300, of which 56% is circulated locally and 44% is sent to outports.
Number of pages: 2 sheets, 4 pages to each sheet.
Size of type-page: 18'' x 21''.
Number and size of columns: 6 columns to a page, each column measuring 21'' x 3''.

 Features page: Literature and Arts Page on Mondays, Construction and Communications Page on Thursdays, and Woman's Page on Sundays.

KANGSU SENG PAO (The Kiangsu Provincial News) (江蘇省報)
Established November, 1930.
Published every morning in the Chinese language including Sundays.
Circulation: 2,500, of which 40% is circulated locally and 60% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 11 1/2'' x 19 1/2''.
Number and size of columns: 12 columns to a page, each column measuring 19 1/2'' x 1 1/2''.

SAN SHAN JIH PAO (San Shan Daily News) (三山日報)
Established June, 1919.
Published every morning in the Chinese language, including Sundays.
Circulation: 2,600, of which 40% is circulated locally and 60% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 14'' x 20''.
Number and size of columns: 10 columns, each column measuring 20'' x 1 1/2''.

SIN KIANG SOO PAO (New Kiangsu Press) (新江蘇報)
Established October, 1928.
Published every morning in the Chinese language including Sundays.
Circulation: 6,500, of which 40% is circulated locally and 60% is sent to outports.
Number of pages: 2 sheets of 4 pages each.
Size of type-page: 14 1/2'' x 20 1/2''.

 Publishers' Remarks: This publication is the only paper controlled by the Kuomintang party in Kiangsu Province. The impartiality of its editorials, the thoroughness and correctness of its reports and the fine quality of its printing have made it the central figure among publications. It has won the confidence of the public.

TSI CHANG PAO (Self-strength Press) (自強報)
Established January, 1919.
Published every morning in the Chinese language, including Sundays.
Circulation: 1,000, of which 70% is circulated locally and 30% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 12'' x 13''.
Number and size of columns: 10 columns to a page, each column measuring 12'' x 1 3/4''.

Number and size of columns: 12, each measuring 14 1/2'' x 11 1/2''.

SIN SENG JIH PAO (New Provincial Daily News) (新省日報)
Established September, 1928.
Published every morning in the Chinese language, including Sundays.
Circulation: 3,000.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 13 1/2'' x 19 1/2''.
Number and size of columns: 10 columns, each measuring 19 1/2'' x 2''.

 Features page: Kuomintang Affairs Page on Sundays.

SOO PAO (Kiangsu News) (時報)
Established November, 1930.
Published every morning in the Chinese language, including Sundays.
Circulation: 4,500, of which 20% is circulated locally and 80% is sent to outports.
Number of pages: 2 sheets of 4 pages each sheet.
Size of type-page: 14'' x 19 1/2''.
Number and size of columns: each page contains 16 columns, each measuring 14'' x 2''.

 Features page: Pictorial Page twice a month.

 Publishers' Remarks: This publication is the only paper controlled by the Kuomintang party in Kiangsu Province. The impartiality of its editorials, the thoroughness and correctness of its reports and the fine quality of its printing have made it the central figure among publications. It has won the confidence of the public.
HAIMEI (海門) lies to the north of the Yangtze River, very near the industrial city of Nantung.

SIN HAI MEN (New Haimen) (新城門)
Established November, 1928.
Published daily.
Circulation: 2,000, of which 80% is circulated locally and 20% is sent to outports.
Number of pages: 4.
Number of columns: 12.

HINGHWA (興化) is a trading market of some importance in northern Kiangsu.

HINGHWA KUNG P A O (Hinghwa Public News) (興化公報)
Established October, 1921.
Published every 5 days in the Chinese language.
Circulation: 1,000, of which 50% is circulated locally and 50% is sent to outports.

HSUCHOW (徐州) in the north of the Province, is at the intersection of the Lung-Hai Railway and the Tientsin-Pukow railway. An aerodrome is situated here. This is an important city for distribution.

HSUCHOW MIN P AO (People’s Press of Hsuehau) (徐州民報)
Established September, 1928.
Circulation: 700, of which 30% is circulated locally and 70% is sent to outports.
Number of pages: 1 sheet of 4 pages.

HSU P AO (Hsuehau Press) (徐報)
Established May, 1931.
Published every morning in the Chinese language, including Sundays.
Circulation: 5,000, of which 70% is circulated locally and 30% is sent to outports.
Number of pages: 2 sheets of 2 pages each.

Size of type-page: 14” × 19”.
Number and size of columns: 10 columns to a page, each column measuring 14” × 2”.

Publishers’ Remarks: This publication is the largest one between the Yangtze and the Yellow River Valleys. Its news reports are fast and accurate. On account of the convenience in transportation, it has circulated since over a year of its publication throughout the province of Shensi, Kansu, Honan, Shantung, Hopei, Kiangsu, Anhwei and Shansi.

SIN HSU JI P AO (New Hsuehau Daily News) (新徐日報)

KIANG YING (江陰) is situated on the southern bank of the Yangtze River. From the military point of view, it is very important.

CHEN CHI P AO (The Righteous Press) (正義報)
Established Feb, 1933.
Published every day in the Chinese language, including Sundays.
Circulation: 1,000, 30% outport, 70% local.
Number of pages: 4.
Size of column: 10” × 15”.
Number of columns: 10.
Size of column: 10” × 1½”.

Publishers’ Remarks: This publication enjoys a wide circulation in the district of Kao-yu. It is owned by prominent merchants of this district, and its chief aim is to promote trade and is not concerned in any other topics. It is a good advertising medium.

NANKING (南京) formerly Kiangningfu, is a walled city on the southern bank of the Yangtze River and supplanted Peking as the capital of the Chinese Republic in 1927. Its rise to fame started in 1926, when it became the Ming capital. In 1853 the city fell into the hands of the Taiping rebels, who held Nanking for ten years before they were driven out by the northern armies. General Gordon took part in this campaign. In 1911 it was captured by the revolutionaries and again in 1913 by Chang Hsun in the second revolution. Foreign interest started with the capture of Nanking in 1842 by the British, and in 1858 under a French treaty it was opened to foreign trade. Politically the city is of importance. The railway connecting it to Shanghai was opened in 1909. Schools and universities are established there and the city has a large aerodrome. It has a population of 735,019 according to the latest official census.

CHUNG KUO JI H P AO (The China Daily News) (中華日報)
Established January, 1932.
Published daily in the Chinese language, including Sundays.
Circulation: 9,000, of which 60% is circulated locally and 40% is sent to outports.

THE CHINA TIMES
(Printed in the Chinese language)

424 Shantung Road, Shanghai, China

PROGRESSIVE MODERN TRUTHFUL CLEAN
for a well balanced knowledge of current events and advertising

SHANGHAI (上海) the largest port of the Far East, was first a fishing village. The city lies on the Whangpoo River, the entrance of which was guarded by the Woosung Forts until they were demolished by the Japanese during the 1932 conflict. Shanghai was opened to foreign trade in 1842. A British settlement was established in the same year. The Taiping Rebellion caused an influx of the wealthier natives of Kiangsu, who fled to the foreign settlement to seek protection. In the following years American and French settlements were granted and in 1863 those of the American and British were amalgamated into the International Settlement. As the importance of the city developed the boundaries of both settlements were extended. A more recently developed branch of the city, Pootung, situated on the opposite side of the Whangpoo to Shanghai, is occupied by factories and godowns. In the west end of the French Concession is the famous Siccawei Observatory, the greatest meteorological station in China, which is owned and staffed by the French Roman Catholic Mission. In the city are many fine buildings and all the main streets are woodpaved or asphalted. Trams, buses, rickshaws and taxis are the different methods of conveyance. To-day the city, with a population of about 3½ millions, is the sixth largest city in the world and is important both as a port and as a manufacturing centre, factories having been established by foreigners and Chinese. The city has its own aerodrome and railways connecting it with Nanking, Peiping, Woosung, Hangchow and by air to western, northern and southern China.

CHEN PAO (The Shanghai Morning Post) (晨報)
Established April, 1932.
Published every morning in the Chinese language including Sundays.
Circulation: 32,000, of which 54% is circulated locally and 46% is sent to outports.

FOR SEVENTEEN YEARS

The China Weekly Review, for a period of seventeen years, has presented a continuous record of political and economic developments in China and the Far East. Students, professors, men of affairs throughout the Far East and abroad consult the current issues and files of The Review for information on important happenings and developments.

Most Widely Quoted

Journal In The Far East

Newspapers and magazines in the Orient and also in America and Europe frequently quote editorial reports and articles which have appeared in The Review. The reason for this is that each issue of the paper contains a complete summary of developments in China as well as developments abroad affecting China—presented in readable form and understandable manner.

The Subscription Rate Is $12 a Year, Including Postage.

Circulation: 600, of which 60% is circulated locally and 40% is sent to outports.

TSIEN SZE YUEH KAN (The Near Thoughts Monthly) (近思月刊)
Established August, 1922.
Published monthly in the Chinese language.
Circulation: 5,000. Read mostly by the pawn-shop brokers. It is not for sale.
KWANGSI PROVINCE

KWANGSI is a southern province of 77,220 square miles. This province is entirely mountainous, the average elevation of its plateaus being 1,000 feet. Its southern frontier bordering Kwangtung is near the coast of the Gulf of Tongking. On the south-western and western side are the Provinces of Kweichow and Yunnan. Hunan Provinces adjoin Kwangsi to the north and north-east and Kwangtung forms the remainder of the eastern boundary.

The climate is tropical. In the south it is extremely hot. It is often quite cold, with slight snow-fall. This province is sparsely peopled, having a population of 12,258,335.

No railways have yet been constructed in this province. But as to motor roads Kwangsi is justified to claim the largest mileage. Radiating from Nanning, capital of the Province, there are a number of motor roads connecting important cities over the Province.

The principal river is the Si-kiang or West River, with a number of tributaries spreading all over the Province, to such an extent that one may travel to all the important cities by launch.

The soil, especially in the east is poor, but the valleys of Yu Kiang and of the West River and their affluents are fertile. Nanning and Wuchow are two of the chief rice-growing centres. Maize is raised everywhere and tobacco grown considerably. The other agricultural products include cassia, camphor, indigo, rice, sugar, hemp, peanuts, rapeseed, and silk. Much of the food produce is exported to Kwangtung.

There are no industries of importance in the Province. The existence of good coal deposits is evident, but the methods employed are rather primitive. The quantity produced is only sufficient for local consumption. Antimony is mined north of Chenan and smelted in crude blast furnaces. Silver is found at Kweihien. Tin, asbestos, galena, platinum, gold, copper, iron and lead are all thought to exist, and some of the mines are being worked on a small scale.

For centuries, Kwangsi was known as one of the most backward provinces. But for the last few years the provincial Government, with the help of experts, did its utmost to develop the Province along every line on a scientific basis. So the situation of late has been so radically changed that it is in a position to claim to be a model province. A great future is ahead of Kwangsi.

At Nanning there are British and French consulates.
KWEILIN (桂林) in the north-east, was the original capital of the Province. The city stands on the Kwei-kiang which joins the Si-kiang at Wuchow. A motor road via Liuchow also connects it to this port. It is the largest city of the north and close to the pass through the northern mountains which leads to Hunan. Silk and fur are its two major industries. Aniseed trees grow in the district, from which an oil is obtained. The picturesque scenery here is famous throughout China. The late Dr. Sun Yat-sen called it the “Switzerland of China.”

YUNG FU YUEH KAN (Ever Benevolent Monthly) (永慈善月刊)
Established August, 1928.
Published monthly in the Chinese language by the Yung Fu Culture Society.
Circulation: 1,200, of which 58% is circulated locally and 42% is sent to outports. Read mostly by scholars.
PUBLISHERS’ REMARKS: Since its initial publication in 1928 the publishers have spared no efforts in the improvement and enlargement of the contents. It has gained the support of the public by the growth of its circulation from a hundred odd copies to 1,200 copies. The editorial department has invited a number of local technical experts to contribute special articles for the entertainment of its readers.

NANNING (南宁) situated in a large plain just below the confluence of the Yu-kiang and the Tso-kiang, is the new capital. It is a treaty port in a fertile district and its chief importance is as an importing and exporting centre. One of its larger industries is the manufacture of firecrackers, and second to this comes the leather industry, which obtains its raw material from the water buffalo and red cattle reared in the vicinity of the city. Great quantities of raw sugar are shipped to the coast for refining. Much cotton is also grown in the district. Nanning will develop when railway communication is established between it and the coast. At present this city is connected by motor roads with most of the larger cities of the Province.

NANNING MIN KUO JIH PAO (Nanning Republican Daily News) (南寧民國日報)
Established 1926.
Published every morning in the Chinese language including Sundays.
Circulation: 8,000, of which 40% is circulated locally and 60% is sent to outports.
Number of pages: 3 sheets of 4 pages each sheet.
size of type-page: 14½" × 19".
Number and size of columns: 10 columns to a page, each column measuring 14½" × 2½".
Publishers’ Remarks: This paper is the leading publication in the province and its circulation has been on the increase steadily.

CHIAO YU LUN TAN (Educational Tribune) (教育論壇)
Established September, 1931.
Published monthly in the Chinese language by the Kwantung Provincial Educational Bureau.
Circulation: 1,000, of which 30% is circulated locally and 70% is sent to outports. Read mostly by scholars.
Number of pages: 116 pages.
size of type-page: 4" × 7½".
Number of columns: 1 column.
WUCHOW (梧州) is situated at the confluence of the Kwei-kiang and the Si-kiang on the eastern frontier of the Province, and is surrounded by mountains. As a treaty port it was opened to foreign trade in 1897 and has rapidly developed as an important commercial and trading port. Steamers can reach it in two days from Canton and Hongkong. It is often flooded in the rainy season, and this accounts for a large number of the inhabitants living in boats. A fine quality rice is grown in the valley and on the nearby plains, and the crops always find a ready market. Minerals are found in easy transport distance, and the mines are just beginning to be developed. Among other things, large numbers of live stock are exported to Hongkong.

DA KUNG PAO (The Impartial Paper) (梧州大公报)
Established 1931.
Language: Chinese.
Published daily.
Circulation: 3,000; 50' outport, 50' local.
Number of pages: 2 sheets of 4 pages each.
Size of page: 20 X 13 X 10 inches.
Number of columns: 5.
Size of column: 13 X 10 X 3 X 10 inches.
Supplement: every Sunday.
Publisher's Remarks: This paper is owned by merchants and has the entire confidence of the public, especially the business men.

WUCHOW MIN KUO JIH PAO (Wuchow Republican Daily News) (梧州民國日報)
Established 1924.
Published every morning in the Chinese language including Sundays.
Circulation: 2,000, of which 40% is circulated locally and 60% is sent to outports.
KWANGTUNG PROVINCE

KWANGTUNG is the richest province in South China, with a total area of 100,000 square miles. Its western boundary borders on Kwangsi, while there is a small portion in the southwestern corner adjacent to Tongking in French Indo-China. Along the northern boundary are the provinces of Hunan, Kiangsi and Fukien. The southern and eastern frontiers are formed by the sea coast, which is 800 miles long without reckoning the minor indentations. Kwangtung has a population of 36,773,502. Canton is its provincial capital.

The climate of Kwangtung is sub-tropical, Canton’s maximum and minimum temperatures being 96° and 43°. The monsoons occur during the summer months, when the prevailing winds are the moisture-laden south-west winds. The rainfall averages eighty-four inches, most of it falling in May, June and July.

Most of the trading centres of the Province are in the vicinity of Canton. The whole of that district is interwoven with canals and rivers, which are served with efficient launch services. Roads are established in different cities and highways connecting the larger cities are now being constructed.

There are five railways running through in the Province, namely, Canton-Kowloon Railway, Canton-Samshui Railway, Swatow-Chaochow Railway, Sunning Railway and Canton-Hankow Railway. The last one still has a distance of 270 miles uncompleted before it connects Canton and Hankow after which it is so named.

Rice, silk, sugar, cotton, tobacco, indigo, tea, ginger, medicines, hemp, peanuts, and tropical fruits are important products. Palms, which furnish leaves for fans, are cultivated in the West River delta. Betel nuts, aniseed, and cassia are other products. Matting, bamboo and bamboo products, grass linen, eggs and egg products, and paper are other exports.

There are several coal mines and some of the larger native deposits are at Shiuichow. There is also a growing demand for wolframite and as it is of superior quality to that obtained from either Australia or Burma, its future should be assured. Antimony, gold, silver, zinc, tin, quicksilver, lead and copper also exist but are only worked on a small scale, if at all.

The following countries have consular representatives resident at Canton: America, Belgium, Denmark, Finland, France,
Germany, Great Britain, Italy, Japan, the Netherlands, Norway, Portugal, Sweden and Switzerland.

Belgium and France have consular representatives resident at Pakhoi.

America, Belgium, France, Great Britain, Japan, the Netherlands and Norway have consular representatives resident at Swatow.

CANTON (廣東) the capital of the Province, lies on the Pearl, or Chu-kiang. River some 95 miles by water and 111 miles by rail from Hongkong. The foreign settlement of the miles has been made and motor buses connect it to the nearby streets have been made and motor buses connect it to the city. Steel bridges have been built connecting cities of Kwantung. Silk bridges have been laid out. Silk to suburb and a system of city parks has been laid out. Silk to suburb and a system of city parks has been laid out. Canton, but in recent years the industry has been passing through trying times. Wolfram ore is exported from the port and through trytimes. The surrounding district is productive; rice, silk, sugar, indigo, tobacco, tea, oil-plants and fruits are grown. Canton has a modern aerodrome.

CANTON DAILY SUN:
Established 1901.
Published every morning in the English language.
Circulation: 2,500 copies daily.
Number of pages: 10.

Language: Chinese.
Published daily.
Circulation: 3,000.
Number of pages: 8.
Size of page: 14½" × 20".

TA CHUNG PAO (The Great Middle Press) (大中報)
Established Jan., 1929.
Language: Chinese.
Published daily.
Circulation: 24,000; 65% outport, 35% local.
Number of pages: 4.
Size of page: 16½" × 21½".
Number of columns: 7.
Size of column: 3½" × 16".
PERIODICALS

CHINA TRUTH
Established 1929.
Published weekly (Saturday) in the English language.
Circulation: 2,000.

CH’AN YEH DAO PAO (The Silkworm Trade Leader)
(聯華貿易報)
Established January, 1929.
Published every three months in the Chinese language by the Silkworm and Silk Improvement Bureau, Canton.
Circulation: 1,000, of which 40% is circulated locally and 60% is sent to outports.

NANHAI HSIEH CHI CHI PAO (The Nanhaihsien Administration Quarterly)
(南海外報季刊)
Established June, 1929.
Published every three months in the Chinese language.
Circulation: 2,500.
Number of pages: 500.
Size of type-page: 5½" × 7½".
Number of columns: 1 column.

PE MAN TIEN YING YUEH KAN
(The Screen Monthly) (自映電影月刊)
Established April, 1928.
Published monthly in the Chinese language.
Circulation: 5,000, of which 60% is circulated locally and 40% is sent to outports.

YUEH TSO YUEH KAN (Kwangtung Salt Monthly) (粵鹽月刊)
Established June, 1917.
Published monthly in the Chinese language by the Salt Gabelle of Kwangtung and Kwangsi Provinces.
Circulation: 700, of which 10% is circulated locally and 90% is sent to outports.
Publishers’ Remarks: This publication contains all laws, ordinances, decrees, and regulations of the Salt Gabelle and does not publish anything else.

MING CHI BAN (HOW KAN)
(The Pearl Newssette)
(明時報周刊)
Established November, 1921.
Published every Sunday and Thursday in the Chinese language by the Cathay Amusements Ltd.

CHUNGSHAN (中山) is a proposed model hsien lying on the sea coast to the north of Macao. As this is the late Dr. Sun Yat-sen’s birth-place, it is named after him in order to commemorate his memory.

TUNG CHEN SUN PAO (The Dung Jan Ten-day Press)
(東晨旬報)
Established July, 1923.

FATSHAN (佛山) on the West River to the west of Canton, is an important manufacturing centre for iron, silk and porcelain.

FATSHAN SHUNG TEH YEE YUEH WEI SUNG YUEH KAN
(The Fatshan Shung-teh Hospital Health Monthly) (佛山盛德醫院衛生月刊)

HOKSHAN (鴻山) is a central city with its motor roads connecting with all important cities.

YING YING (英聲)
Established September, 1928.
Published monthly in the Chinese language by the Hokshan District Middle School.
Circulation: 2,000, of which 20% is circulated locally and 80% is sent to outports.

LIUCHOW (鶴州) is a southern city standing on the peninsula on the coast of Liuchow Bay. In the north is the Kwangchow Bay, which was leased to the French during the time of the so-called “Battle of Concessions”. The chief products are straw bags, gunnards, fish and salt.

LIUCHOW MIN KUO JI H PAO
(Liuchow Republican Daily News) (鶴州民國日報)
Established July, 1925.
Published every morning in the Chinese language except Sundays.
Circulation: 700, of which 50% is circulated locally and 50% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 13½" × 18½".
Number and size of columns: 6 columns, each measuring 13½" × 3".

MEIHSIEN (梅縣) is in the northeast of the Province, lying on the north bank of the Mei-kiang.

MEIHSIEN MIN KUO JI H PAO
(Meihsien Republican Daily News) (梅縣民國日報)
Established May, 1927.
Published every day in the Chinese language including Sundays.
Circulation: 2,000, of which 70% is circulated locally and 30% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 14" × 20".
Number and size of columns: 8 columns, each measuring 14" × 2¼".

SUNWEI (新會) is also a southern city, the western terminus of the Sunning Railway, the chief products of which are palm leaf fans and sweet oranges.

MIN CHUNG JI H PAO (The Populace Daily News) (民衆日報)
Established February, 1929.
Published every morning in the Chinese language except Sundays.
Circulation: 5,000, of which 40% is circulated locally and 60% is sent to outports.
Number of pages: 2 sheets, 4 pages to each sheet.
Size of type-page: 14" × 20½".
Number and size of columns: 6 columns, each measuring 14" × 3½".
SWATOW (汕頭) in the north-east of the Province, lies on a promontory with the Han River on its northern side and an inlet of the sea to the south. Although strong opposition greeted the opening of the port to foreign trade, these prejudices died a natural death when the natives realized that a treaty port was to their advantage. Rice, sugar, camphor and fruits are some of the important agricultural crops of the district. Drawn-thread work and embroidery are two of the most important industries of this city. Chinaware is also of importance. A large annual emigration takes place from this port. Bean-cakes are one of the chief imports of SWATOW. The port is now rapidly being developed into one of the modern cities of China. SWATOW has suffered from terrific typhoons on many occasions.

HAN KIANG PAO (Han River Press) (漢江報)
Language: Chinese.
Established May, 1928.
Published daily except Monday.
Circulation: 1,300, 90% local.
Number of pages: 8.
Size of type-page: 15½" × 20⅜".
Number and size of columns: 8 columns, each measuring 15½" × 2⅜".

SWATOW MIN KIO JIH PAO
(Swatow Republican Daily News) (汕頭民國日報)
Published every morning in the Chinese language except Mondays.
Circulation: 3,000, of which 50% is circulated locally and 50% is sent to outports.
Number of pages: 3 sheets of 4 pages each.
Size of type-page: 13¾" × 19⅛".
Number and size of columns: 10 columns in a page, each column measuring 13¾" × 2½".

FENG HWA JI HAO PAO
(Seng Hwa Daily News) (星華日報)
Established July, 1931.
Published daily except Sundays.
Circulation: 6,240; 67% output, 33% local.
Number of pages: 5 (2½ sheets).
Size of page: 13" × 20".
Number of columns: 10.
Size of column: 13" × 2".

SWA PAO (Swatow Press) (汕頭報)
Established October, 1929.
Size of type-page: 15" × 20⅜".
Number and size of columns: 8 columns, each measuring 15" × 2⅜".

SWATOW MIN SHENG JIH PAO
(Swatow People's Voice) (汕頭民生報)
Published every morning in the Chinese language except Mondays.
Circulation: 3,100, of which 50% is circulated locally and 50% is sent to outports.
Number of pages: 2 sheets of 4 pages each.
Size of type-page: 13¾" × 19⅛".
Number and size of columns: 6 columns in a page, each column measuring 13¾" × 3".

PERIODICALS

FENG PAO (The Wind) (風報)
Established November, 1930.
Published every three days in the Chinese language.
Circulation: 1,800, of which 60% is circulated locally and 40% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 9¼" × 14⅝".
Number and size of columns: 6 columns, each measuring 9¼" × 2⅛".

CHINA MAIL
Established 1845.
Published every evening except Sundays in the English language.
Circulation: 1,800 copies, 95% local, 5% output.
Number of pages: 12-14.
Size of type-page: 16¼" × 20".
Number of columns: 7, width 2¼".

TING TUNG CHIA YIN (The Benevolent Voice of East Kwangtung) (嘉東報)
Established January, 1926.
Published monthly in the Chinese language by the Protestant Mission.
Circulation: 500, of which 50% is circulated locally and 50% is sent to outports.
Number of pages: 45.
Size of type-page: 5¼" × 8".
Number of columns: 1 column.

TAISHAN (台山) is a southern city on the Sunning Railway. Transportation facilities are well provided for.

KANG CHI SHEN MONTIILY (�estinal Monthly)
Established January, 1928.
Published every month in the Chinese language by Protestant Missions.
Circulation: 600, of which 80% is circulated locally and 20% is sent to outports.

YEE LUN PO (The Public Opinion) (與論報)
Established December, 1913.
Published every morning in the Chinese language except Sundays.
Number of pages: 2 and a half sheets—10 pages.

HONGKONG (香港) a British crown colony consisting of the island of Hongkong and some leased territory, Kowloon, on the adjacent main land, is the largest seaport in the Orient and the sixth largest seaport in the world. It has a population of 500,000, including 15,000 foreigners. The reasons for its prosperity are: (1) its splendid position at the outlet of southern China, and (2) the careful policy of the British government to lay no taxes that would interfere with trade. It is the terminus of two great trade routes—one to Europe by Suez and the other to America across the Pacific. Many smaller steamers sail to Japan, Australia, India, Indo-China, the East Indies, and coast and river ports of China. The main business of Hongkong is to exchange the products of China for those of Europe. Hongkong has many manufacturing industries. There are large sugar refineries, cotton factories, ship-building and repair yards, and cement and flour mills.

Circulation: 4,900, 80% output, 20% local.
Number of pages: 8.
Size of type-page: 13½" × 20⅜".
Number and size of columns: 4 columns, each measuring 5½" × 13½".

TAISHAN MUN KEANG MONTHLY (台山文鏡月刊)
Established December, 1923.
Published monthly in the Chinese language.
Circulation: 1,200, of which 50% is circulated locally and 50% is sent to outports. Read principally by overseas Chinese.
Number of pages: 100.
Size of type-page: 4½" × 6⅝".
Number of columns: 1 column.

CHUNG HWA YAT PAO (The China Daily News) (中華日報)
Established February, 1926.
Published every morning in the Chinese language including Sundays.
Circulation: 32,000.
Number of pages: 2 sheets of 4 pages.
Size of type-page: 15½ " x 21".
Number and size of columns: 8 columns in a page, each column measuring 15½ " x 2½ ".

HONGKONG DAILY PRESS
Established 1857.
Published every morning except Sundays in the English language.
Circulation: 2,000, of which 90% is sent to outports.
Number of pages: 16.
Size of type-page: 15½ " x 20".
Number and size of columns: 7 columns, width 2½ ".
Feature pages: Thursday: Radio; Tuesday: Motor; Wednesday: Aviation; Friday: Ladies; and Saturday: Building & Engineering.

HONGKONG SZE PAO WAN KAN (The Hongkong Times Evening Edition) (香港時報晚間)
Established May, 1923.
Published every evening in the Chinese language except Sundays.
Circulation: 8,000, of which 60% is circulated locally and 40% is sent to outports.
Number of pages: 2 sheets, 4 pages to each sheet.
Size of type-page: 15½ " x 20".
Number and size of columns: 8 columns in a page, each column measuring 15½ " x 2½ ".

HONGKONG TELEGRAPH
Established 1860.
Published every evening in the English language.
Circulation: 2,500.
Number of pages: 12.
Size of type-page: 15½ " x 20".
Number and size of columns: 7, width 2½ ".

KUNG SHEONG WANG PAO (Industrial and Commercial Evening Press) (工商業晚報)
Established November, 1930.
Published every evening in the Chinese language including Sundays.
Circulation: 8,000, of which 22% is circulated locally and 78% is sent to outports.
Number of pages: 4 sheets, 4 pages to each sheet.
Size of type-page: 15½ " x 21".
Number and size of columns: 8 columns in a page, each column measuring 15½ " x 2½ ".

KUNG SHEONG YAT PAO (The Industrial and Commercial Daily Press) (工業日報)
Established July, 1925.
Published every morning in the Chinese language except Sundays.

Size of type-page: 9½" × 14".
Number and size of columns: 6 columns, each measuring 9½" × 2½".

KING SING (The Golden Star) (金星)
Established November, 1929.
Published every Thursday in the Chinese language.
Circulation: 6,000, of which 45% is circulated locally and 55% is sent to outports.
Number of pages: 8 pages.
Size of type-page: 9½" × 14½".

MACAO (澳門) is a Portuguese colony on the mainland of China, 35 miles from Hongkong, with a population of 878,000. Here is a good place for ships to seek refuge at the mouth of the Pearl River. The Portuguese came here as early as the year 1557 under the Ming Dynasty. In 1887, an agreement was reached with the Manchu Government so that the Portuguese were given the exclusive right to rule over this place, the total area of which is four square miles only.

MACAO SHIH PAO (Macao Times) (澳門時報)
Established 1930.
Published every morning in the Chinese language including Sundays.
Circulation: 5,000, of which 70% is circulated locally and 30% is sent to outports.
Number of pages: 2 sheets, 4 pages to each sheet.
Size of type-page: 13¾" × 19".

MIN SUN JIH PAO (People's Livelihood) (民生日報)
Language: Chinese.
Established January, 1930.
Published every day except Sundays.
Circulation: 1,000; 60% outport, 40% local.
Number of pages: 2 and a half pages.

MIN SHENG YAT PAO (New Voice Daily News) (新聲日報)
Established March, 1927.
Published daily.
Circulation: 2,000.
Number of pages: 8½ pages.
Size of page: 14" × 19½".
Supplements: Oct. 10 and New Year.
KWEICHOW PROVINCE

KWEICHOW is a plateau sloping toward the Yangtze, averaging 6,000 feet high in the south and 2,500 in the north. It has an area of 67,182 square miles and a population of 11,291,261.

The northern boundary is formed by Szechwan and on the north-west Szechwan and Yunnan take an equal share of the frontier; the latter province also makes up the whole of the western boundary. Hunan is adjacent to Kweichow on the eastern side and Kwangsi is on the south and also forms a small portion of the south-eastern boundary.

The climate of Kweichow is very damp especially in the lower regions adjoining Hunan and Kwangsi. Changes of temperature are rapid and from October to February peculiar foggy conditions prevail. But the end of December is often quite pleasant and a good month for travel in the Province. The altitude prevents excessive summer heat.

All the roads converge to the central city, Kweiyang, the capital of the Province. Since not only is there a lack of navigable rivers, but railways have not yet been built, communications difficult. Stone-paved roads are numerous; until recently all travel and transportation of freight was by man-power or pack-animals. In recent years, several new motor roads have been constructed and buses have been running between important cities.

Kweichow is said to be the poorest agricultural province in China. The only large plain lies in the vicinity of Kweiyang. Maize or Indian corn and buckwheat are grown in quantities. Next in importance are tobacco, bamboo, wheat, oats, sugar, hemp, and beans. There are rich forests; timber, wood oils, and varnish are exported.

The mining possibilities of Kweichow are thought to be of great wealth. Coal and iron are plentiful. The richest quicksilver mines in the world are waiting to be developed. Silver, copper, antimony, zinc, nickel, asbestos, mica, sulphur, and marble are also found.

This is one of the few of China’s provinces that have no treaty port and no consular representatives of any country resident at any of its cities.
CHIHSHUI (赤水) is a northern city on the Chih Shui, or Red Water, bordering on Szechwan.

MIN TSE (People's Rule) (民主)
Established October, 1930.
Published every three days in the Chinese language.

KWEIYANG (貴陽) capital of the Province, is situated in the centre of Kweichow in a basin-shaped plain lying 3,700 feet above sea-level. Roads meet at Kweiyang from all parts of the Province. An arsenal is established in the city, which is partially illuminated by electricity. Recently the main streets of the city have been widened and modernized.

MIN CHUNG DAILY NEWS (民衆日報)
Established June, 1929.
Published every morning in the Chinese language including Sundays.
Circulation: 3,000, of which 74% is circulated locally and 26% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 13½" × 19½".
Number and size of columns: 10 columns in a page, each column measuring 13½" × 1½".

Publishers' Remarks: This publication is one of the most widely circulated paper in Kweichow. It supports the viewpoint of the masses and is popular with the public.

SIN CHIEN JIH PAO (The New Kweichow Daily Press) (新貴陽報)
Established June, 1927.
Published every morning in the Chinese language including Sundays.
Circulation: 3,500, of which 40% is circulated locally and 60% is sent to outports.
Number of pages: 2 sheets of 4 pages each sheet.
Size of type-page: 13" × 18½".
Number and size of columns: 10 columns in a page, each column measuring 13" × 1¼".
Feature pages: daily supplements.
MANCHURIA

MANCHURIA is made up of three provinces, namely, Liao­ning, Heilungkiang and Kirin. The total area is 363,700 square miles. Most of the northern boundary is formed by the Amur River which divides Siberia from Manchuria in the north-west. The River Argun forms the international boundary between the two countries. Jehol and Hopei Provinces are on the western boundary. To the south-east is Siberia, and to the south is the sea.

The climate of Manchuria is greatly influenced by the Mongolian desert. In winter it is very cold and the season generally lasts for nearly six months; along the banks of the Amur River very low temperatures have been recorded. The air is dry, and the climate is very bracing and healthy in winter.

The Liao River is navigable for nearly two hundred miles for small native crafts, but in winter it is frozen over. The Yalu River is navigable for ocean liners for some thirty miles; large native junks can ascend 350 miles up the river and small craft still higher. The Sungari River is navigable up to Kirin. 1,500 miles of the Amur River are navigable. The Ussuri River is used by boats as far as Lake Hanka.

Liaoning is supplied with roads, and Kirin is not too badly off, but communication in Heilungkiang is poor. All the larger cities of Manchuria have good roads, but there is still a lack of highways connecting the large towns.

The main lines of communication in Manchuria are as follows:

1. The South Manchuria Railway, one of the most important lines of this vast territory. It has two main lines: the Dairen-Mukden line and the Antung-Mukden line.

2. The Chinese Eastern Railway. Its southern terminus is Changchun, from whence it runs to Harbin, where the main line crosses the country from Manchuli in the north-west to Suifenho on the eastern boundary. At Manchuli connection is made with the Trans-Siberian Railway and at Suifenho with the Ussuri Railway to Vladivostok.

3. The Peiping-Mukden Railway crosses the frontier at Shanhaikwan.

Other railways are the Taonan-Anganchi Railway, Taonan-Sulun Railway, Kirin-Mukden Railway, Suipingkai-Taonan Railway, Kirin-Changchun Railway, Kirin-Tunghua Railway, and the Tienpaoshan-Tumenkiang Railway. The Tunghua-
Tumen Railway was opened to traffic on June 8, 1933, thus making a through communication between Changchun and the coast near Vladivostok.

The plains and valleys of Manchuria are rich agricultural lands which have been developed with the growth of the railway system. Manchuria's principal crop is the soya bean, which is responsible for its great prosperity in recent years. Other important crops are wheat, millet, kaoliang, indigo, flax, tobacco, ginseng, hemp, sesamum, sugar beets, barley, corn, oats, peas, vegetables and fruits.

Live-stock breeding was one of the oldest of Manchurian interests. Horses and ponies are still bred in large numbers, especially in the western regions. Other domestic animals are sheep, hogs, cattle, mules and donkeys.

Dairen is the chief bean-oil producing city in Manchuria. The distilling of a native spirit from kaoliang is an important industry and is chiefly carried on in Kirin. Several breweries and vodka distilleries are established, the main centre being at Harbin. Flour mills have been established and the main centres are at Harbin and Changchun. The tobacco industry is fostered by large tobacco concerns of China; factories are established at several of the larger cities, Mukden being the chief centre. The spinning and weaving industry is old and has been carried on in the farming homesteads for centuries. Wool and camel hair is principally exported in the raw state.

Several different minerals are found but the two largest mines are of coal and iron. The coal deposits of Manchuria are estimated at 1,700,000,000 tons; the two largest beds are at Fushun and Yentai. Most of the iron mines are found in Liaoning; the deposits are estimated at 400,000,000 tons and the two important mines are at Penshiu and Anshan. In Kirin exist several gold mines. The manufacture of salt is a large industry, especially in the southern coastal ports of Manchuria.

Consular representatives of foreign countries are resident at the following ports:

- Antung — France and Japan; Dairen — America, Finland, France, Great Britain, Netherlands and Sweden; Mukden — America, France, Germany, Great Britain and Japan; Harbin — America, Belgium, Denmark, Estonia, France, Germany, Great Britain, Italy, Japan, Latvia, Netherlands, Poland and Portugal; Newchwang — France, Great Britain, Japan, Netherlands and Norway. The Liaotung peninsula is administered by the Kwantung Government.
CHANGCHUN (長春) on March 9, 1932, was proclaimed to be the capital of the so-called Manchukuo state and its name has been changed to Hsinking, meaning the "New Capital." The city is chiefly engaged in a busy exporting trade in furs, beans, and tobacco. These products are exported to the outside world through the ports of Newchwang (Yingkow) and Dairen. The city is in an important position, being at the northern terminus of the South Manchurian Railway and at the southern terminus of the Chinese Eastern Railway.

DAH DONG PAO (The Utopia Press) (大東報)
Established 1918.
Published daily.
Circulation: 51,000; 90% outports.

DAIREN (大連) lies on the South Manchurian Railway and is on the Liaotung Peninsula in Kwantung Territory. It is the best treaty port in Manchuria and is ice-free during the winter. Under the Japanese, the skeleton of the city commenced by the Russians has developed into one of the most modern and well-managed ports of the Far East, being only second to Shanghai. In spite of adverse conditions during the last few years, the import and export trade has been making headway; good roads run through the city, which is furnished with electricity, electric trams, gas, telephones and is connected with Japan both by regular steamers and by a weekly air service. Dairen is the principal soybean centre of Manchukuo. Many mills have been established for crushing purposes and for turning out bean products which are exported to all parts of the world.

KWANTUNG PAO (Kwantung Press) (關東報)
Established July, 1918.
Language: Chinese.
Published daily.
Circulation: 70,000; 80% outports, 20% local.
Number of pages: 2 sheets of 4 pages each.
Size of paper: 15" × 19 ½".
Number of columns: 12.
Size of column: 15" × 1 10/16".

MANSHU NIPPO (滿洲日報)
Published every morning in the Japanese language including Sundays.
Number of pages: 3 sheets, 4 pages to each sheet.
Size of type-page: 15" × 20 ½".
Number and size of columns: 13 columns, each column measures 15" × 2 ½".

TAI TUNG JIH PAO (Tai-tung Daily News) (台東日報)
Published daily in the Chinese language including Sundays.
Circulation: 33,000; 45% local, 55% outports.
Number of pages: 2 sheets, 4 pages to each sheet.
Size of type-page: 15" × 20".
Number and size of columns: each page contains 12 columns and each column measures 4 9/16" × 1 1/4".

HARBIN (哈爾濱) on the northern frontier of Kirin and situated on the right bank of the Sungari River, is an important northern commercial city. The city is composed of different expanded settlements and is the railway centre of North Manchuria. There is still a large riverine trade carried on in the summer months. The Government of Manchukuo has decided to electrify the whole of the country and for this purpose sixty companies are to be formed with a capital of one hundred million dollars. Harbin is to be the chief northern electrical distribution centre and Fushun the centre in the south. Electric trams run in the city and flour mills and bean factories are in operation.

HARBIN OBSERVER (哈爾濱英文報)
Established since 1924.
Published every evening except Sundays, in the English language.
Circulation: 1,000 - 1,500.
Number of pages: 4 - 8.
Size of type-page: 11 ½" × 15 ½".
Number and size of columns: 8—width 2 ¼".
Feature pages: Automobiles on Wednesday; Sports on Saturday.

SHANG PAO WAN KAN (Evening Issue of Commercial News) (商報晚刊)
Established 1932.
Language: Chinese.
Published daily.
Circulation: 2,000.
Number of pages: 1 sheet of 8 pages.
Size of page: 14 × 9 2/3 inches.
Number of columns: 7.
Size of column: 2 × 9 2/3 inches.
Setting facilities: Good.

CHUNG TUNG LI CHIN TSI YUEH KAN (The Economic Monthly of Chinese Eastern Railway) (中國東部鐵路月報)
Established March, 1925.
Published every month in the Chinese language.
MUKDEN (奉天) is the capital of Liaoning Province. The city is one of the largest and most prosperous in Manchuria, being the headquarters of the South Manchurian Railway, which has many other commercial concerns besides that of the railway company. The city was one of the strongholds of the Russians during the Russo-Japanese War, and eventually surrendered to the Japanese after the most decisive battle of the war had been fought outside the city. There are several interesting historical remains in the city which attest to the former greatness of the Manchus. Mukden lies at an important junction of five railways and is the chief centre of the tobacco industry of Manchuria. Factories are established for the spinning and weaving of hemp, silk and cotton. Mukden, now a modern city, is equipped with electric trams and lights; the streets are kept in good condition, and an aerodrome now serves this busy centre.

MIN PAO (The People's Press)

Established Sept. 1924.
Language: Chinese.
Published daily.
Circulation: 50,000; 90% outport, 10% local.
Number of pages: 8.
Number and size of columns: 12; 14" x 1 1/16".

SHENG KING SHIH PAO (Mukden Times)

Published daily in the Chinese language including Sundays.
Circulation: 50,000 copies.
Number of pages: 2 sheets, 4 pages to each sheet.

NEWCHWANG (牛莊) opened to foreign trade in 1864, was the first treaty port and for many years the only port of Manchuria. There are two separate cities of Newchwang: Old Newchwang and Newchwang itself, now called Yingkow. The Newchwang and Newchwang itself, now called Yingkow. The Newchwang and Newchwang itself, now called Yingkow. The Newchwang and Newchwang itself, now called Yingkow. The Newchwang and Newchwang itself, now called Yingkow. The Newchwang and Newchwang itself, now called Yingkow.
NINGHSIA PROVINCE

NINGHSIA was formerly a part of Kansu, but it has recently been divided from Kansu and formed into a separate province. It has only a history of six years.

From the southern corner to the north-western corner the adjoining province is Kansu; the northern boundary is formed by Mongolia and the eastern by Suiyuan.

NINGHSIA has an area of 77,900 square miles, and its population is 1,450,000, having a density of only 21 per square mile.

All through the winter the country is snow and ice bound, and cold winds blow down from Mongolia. It is however, hot in summer and temperatures of over 105 degrees are often recorded. NINGHSIA is not quite so warm in summer as Kansu.

The province is both a mountainous and desert country, in which there is no river suitable for navigation, and no railway has yet been built. A proposed line is from Paotow to NINGHSIA, capital of the province.

Being so mountainous and unsuitable for agricultural development, the farming interests of the people of NINGHSIA are similar to those of Kansu, that is, negligible.

In NINGHSIA the mining possibilities have not yet been properly exploited even though coal and iron deposits are known to exist in fairly large quantities.

NINGHSIA is the only city of any size in NINGHSIA Province, of which it is the capital. It is close to the Hwang-ho and badly situated on a large plateau, as it is liable to be flooded by this river. It possesses a gateway through the Great Wall and was badly sacked during one of the Mohammedan insurrections. NINGHSIA is virtually an oasis in the Alashan desert, and has been created by one of the oldest and most remarkable irrigation systems in China. The main canals leading water from the Yellow River have been functioning for hundreds of years.

SIN NING JIH PAO (New NINGHSIA Daily News) (新寧夏日報)
Established 1930.
Published every day in the Chinese language including Sundays.
Circulation: 400, of which 50% is circulated locally and 50% is sent to outports.

Area: 77,900 square miles.
Population: 1,450,000.
Important City: NINGHSIA.
SHANSI PROVINCE

Shansi is a mountainous province, with an area of 81,853 square miles. To the north and north-west are the provinces of Chahar and Suiyuan, separated from Shansi by the Great Wall; to the west and south, across the Yellow River, are the provinces of Shensi and Honan; to the east is the province of Hopei, also bounded by a branch of the Great Wall.

Shansi has a population of 12,153,127, thus making 149 persons per square mile. Taiyuan is its provincial capital. The climate is both cold and dry.

The Fen-ho is navigable for flat-bottomed barges from the Hwang-ho to Kiangchow. The Hwang-ho is only navigable in certain parts.

Besides motor roads connecting all principal towns in the Province, there are two railways. The Peiping-Suiyuan Railway enters the north-east of the Province and runs to Tatung, from whence it turns northwards on its way to Paotow in Suiyuan. The Cheng-Tai Railway runs from Taiyuan to Shihchiachwang in Hopei, where it connects with the Peiping-Hankow Railway.

The valleys have a rich loess soil, but the uncertain rainfall and difficulties of irrigation make farming difficult. The best grapes in China come from Shansi. Wheat, millet, kaoliang, beans, buckwheat and rice form the staple foods of the natives.

The southern third of Shansi, a plateau averaging 3,000 feet high, is a vast coal field. At present 2,500,000 tons of coal are mined each year. The immeasurable supplies of excellent coal and of iron ore should make southern Shansi a great iron and steel centre in the future. Gold, nickel, petroleum, and marble are other mineral products.

Luán (潞安) is in the centre of the Province. It is surrounded by high mountains.

Luán Min Pao (Luan People's News) (潞安民報)
Established July, 1931.
Published every three days in the Chinese language.
Circulation: 800, of which 60% is circulated locally and 40% is sent to outports. Read by school teachers and business people.

TaiKu (太谷) is in the center of the province. It is connected by a highway with Yutze, which is on the Cheng-Tai Railway.
TAIKU SIN CHI PAO (Taiku Weekly) (太谷星期报)
Established April, 1919.
Published weekly in the Chinese language.
Circulation: 630, of which 40% is circulated locally and 60% is sent to outports. Read by the intellectual and business people.
Number of pages: 3 sheets—6 pages.
Size of type-page: 11" × 13".
Number and size of columns: 2 columns, each measuring 11" × 4½".

TAIYUAN (太原) the capital of the Province, has a population of 230,000. The city is situated in a fertile plain, which is surrounded by mountain ranges. The provincial government offices, the Shansi University and several banks are within the city walls. North is a large plateau of great mineral wealth, where coal, iron and sulphur are mined and transported to the capital by ox-carts; from thence these minerals are sent by rail to different parts of China. At one time Taiyuan was important as the manufacturing centre of iron weapons.

CHINYANG JIH PAO (Chinyang Daily News) (金州日报)
Established 1906.
Published daily in the Chinese language including Sundays.
Circulation: 5,000, of which 40% is circulated locally and 60% is sent to outports.
Number of pages: 2 sheets, 4 pages to each sheet.
Size of type-page: 14" × 20".
Number and size of columns: 10 columns in a page, each column measuring 14" × 2".

Publishers' Remarks: This publication was established by well-known people of the province and is not connected in any way with politics. Its news reports have been fast and accurate since its inauguration. Its policy has always been just and impartial and it has won the confidence of the public.

CHUNG PAO (The Central Press) (中报)
Established April, 1933.
Published every morning in the Chinese language including Sundays.
Circulation: 5,000.
Number of pages: 4.
Size of type-page: 14" × 19½".
Number and size of columns: 10 columns, each column measuring 14" × 2".

DON CHUNG (The Young Bell) (新潮)
Established March, 1932.
Language: Chinese.
Published daily.
Circulation: 1,500; 70% outport, 30% local.
Number of pages: 8 pages to a sheet.
Number of columns: 4.

PINGCHOW SIN PAO (Pingchow News) (并州新闻)
Established August, 1917.
Published daily in the Chinese language including Sundays.
Circulation: 2,000.

SHANSHI JIH PAO (Shansi Daily News) (山西日报)
Established June, 1917.
Published every morning in the Chinese language including Sundays.
Circulation: 5,500, of which 30% is circulated locally and 70% is sent to outports.
Number of pages: 1 and a half sheets—6 pages.
Size of type-page: 14½" × 19½".
Number and size of columns: 10 columns, each measuring 14½" × 2".

TAIYUAN HWA WEN WAN PAO (Taiyuan Evening News) (太原晚晴报)
Established November, 1931.
Published daily in the Chinese language.
Circulation: 3,000.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 9½" × 13".
Number and size of columns: 8 columns, each measuring 9½" × 1½".

Circulation: 500, of which 20% is circulated locally and 80% is sent to outports.
Number of pages: 84.
Size of type-page: 8½" × 5½".
Number and size of columns: 1 column.
SHANTUNG PROVINCE

SHANTUNG is one of China's coastal provinces. The north and north-west is bounded by Hopei; the east by the Yellow Sea; Kiangsu and Honan form its southern and south-western boundaries.

Shantung has a population of 34,375,849, in an area of 55,984 square miles. The density of population is therefore 614 to the square mile.

The climate is hot, but pleasant and healthy. During the month of July fogs frequently occur on the coast, and the rainy season begins. There is usually a heavy snowfall in winter.

Roads are few and rivers are mostly not navigable for large craft. The only waterway of importance is the Grand Canal, passing through the province from north to south in the western part of the Province.

The two railways which serve as the important means of communication in Shantung are the Tientsin-Pukow Railway and the Shantung Railway.

The soil is very fertile and land is extensively cultivated, especially in the southern part towards the Kiangsu border. The chief crops are wheat, cotton, kaoliang, beans, tobacco, peanuts, and hemp. The annual peanut crop is nearly 4,000,000 piculs. The Shantung cabbage is considered a delicacy.

Cattle and sheep raising are very important industries, as are the weaving of silk and pongee, straw braid, and hair nets. The export of hides and bristles is large. Shantung raises 25,000,000 pigs each year, and exports about 250,000 piculs of beef annually. Wine is made from grapes grown in the Chefoo area.

The best deposits of coal mines are situated along the Shantung Railway. Gold is the second mineral in importance. Iron, copper, lead, gypsum, galena and mica are all known to be in existence, but are not mined to any extent. Marble and soapstone quarries are in the Laichow district.

So far as foreign trade is concerned, Chefoo, Tsinan, and Tsingtao are considered to be the three main centres in Shantung. Tsinan, as the provincial capital and the railway centre, is now a flourishing foreign trade city. Being situated on the sea coast and connected with the Shantung Railway, Tsingtao commands the majority of foreign trade, but Chefoo has gradually lost its importance as trade centre since the building of the Shantung Railway. Most of the countries have a representative resident at these three places.
CHEFOO (芝罘) is a treaty port that was opened to foreign trade in 1863. Foreigners are permitted to reside in the city though no special settlement has been granted. The Municipal Council includes both Chinese and foreigners. The name of the port is Yentai. Chefoo is actually on the opposite side of the bay to Yentai, but the name of Chefoo has now been adopted for the port. Chefoo originally held the monopoly in the exportation of silk, but with the building of the Shantung railway by the Germans, the port lost its premier position. The silk filatures of the city relied on the importation of silk cocoons from Manchuria, as the supply of cocoons in Shantung itself could not meet the demand. Manchuria has now established her own silk filatures in Antung, and consumes its own supply of cocoons. This has been a serious setback to the silk merchants of Chefoo and has brought about the emigration of thousands of Shantung men annually to Manchuria, who usually return to their Province in winter. Chefoo is now a large emigration port. Beet sugar refining mills and beer brewing are now her principal industries.

CHEFOO DAILY NEWS
Established 1915.
Published daily except Mondays in the English language by James McMullan & Co., Ltd., Chefoo.
Circulation: 250 copies daily.
Number of pages: 12.
Number of type-page: $13\frac{1}{2}'' \times 8\frac{1}{2}''$.
Number and size of columns: 3 columns each page, width of col. 16 em.

CHEFOO JIH PAO (Chefoo Daily Press) (芝罘日報)
Established 1910.
Published daily in the Chinese language including Sundays.
Circulation: 1,700, of which 60% is circulated locally and 40% is sent to outports.
Number of pages: 2 sheets of 4 pages each sheet.
Size of type-page: $14\frac{1}{2}'' \times 19''$.
Number and size of columns: 6 columns to a page, each column measuring $14\frac{1}{2}'' \times 3\frac{1}{2}''$.

TSAOHSIEN (曹縣) is a northwestern city bordering on Kiangsu Province, with motor roads and high ways to connect with all important neighbouring cities.

SIN TSAO HSIEH (The New Tsaohsien) (新曹縣)
Established March, 1928.
Published every Saturday in the Chinese language by the Kuominthang Party.
Circulation: 1,000, of which 55% is circulated locally and 45% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 8¼" × 13¼".
Number and size of columns: 3 columns, each measuring 8¼" × 4¼".

TSINAN (濟南) is the provincial capital, with a large population of 433,898, and is situated three and a half miles from the Hwangho to the north and Taishan to the south. The city owed its importance to its being at the junction of two main waterways, the Hwangho and the Grand Canal. The contraction of the Tientsin-Pukow Railway supplemented water communication, but Tsinan retains its importance as a trading centre as it lies on the Tientsin-Pukow railway and is also the terminus of the Shantung railway; the former was completed in 1912 and the latter in 1904. Tsinan, from 1122 to 249 B.C., was the capital of the Principalities of Chi and Lu. During the Ming Dynasty it rose to fame as an important political centre and first became the capital of the Province. In 1904, Tsinan was opened to foreign trade, an area being set aside for foreign residence, known as Shangpu, which means the Trading Quarter, and is situated outside the walls of the native city. Chufu, the birthplace of Confucius are the two chief cities of the city. The larger industries of Tsinan are the manufacture of tussah and pongee silk; dyeing and weaving works; arsenals, which manufactures munitions, wrought iron and copper plate articles. Electricity is supplied by a power company. Tsinan has an aerodrome.

CHEN KWANG PAO (The Morning Light) (公光報)
Established October, 1928.
Published daily in the Chinese language including Sundays.
Circulation: 10,000, of which 35% is circulated locally and 65% is sent to outports.

TSINGCHENG (濱城) is a northern city standing on the eastern bank of the Yellow River. It is of some trading importance.

MIN SHENG CHOW PAO (The People's Voice Weekly) (民生週報)
Established October, 1931.
Published every Monday in the Chinese language.
Circulation: 400, of which 50% is circulated locally and 50% is sent to outports.
TSINGTAO (青島) a treaty port, is one of the finest cities in the Far East. When the Germans seized Kiaochow Bay in 1898, Tsingtao was included in the leased territory. Under German administration a well laid out city was built, the name of the city being taken from the island within the bay. On the outbreak of the Great War, Japan after declaring war on Germany, took Tsingtao by force of arms, but returned the territory to China in 1922. The city is divided into five sections (1) Administrative quarter, former German quarter; (2) Commercial quarter of the Chinese and Japanese; (3) Foreign trade quarter, all the large foreign business houses are situated here; (4) The new town quarter, which was built by the Japanese during their occupation and contains the offices of all the Japanese banks and shipping firms; (5) The summer residence quarter, which is in the finest and healthiest position. Good sea bathing, beautiful parks and a race-course are some of its many attractions. The port is made up of two harbours, the Great Harbour and the Small Harbour; the former has accommodation for ocean liners and a railway line connects it with the Shantung Railway; the latter is used by junks and has a pier. Its industries include a brewery, refrigerating plant, bone-meal fertiliser factory, railway repair shop, spinning mills, silk filatures, flour mills and salt works. Its population is 448,187.

Established January, 1924.
Published every morning in the Chinese language including Sundays.
Circulation: 2,500, of which 75% is circulated locally and 25% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 14 1/2" × 20".
Number and size of columns: 12 columns to a page, each column measuring 14 1/2" × 1 1/4".

Publishers' Remarks: This publication has adopted the most modern method of printing and editing. Special correspondents are engaged throughout all im-
important cities. Its news reports are accurate and fast and its policy is impartial and just. It leads all other publications in Tsingtao.

**TSINGTAO SHIMPO** (Tsingtao New Press) (壽光匯譯)

Established January, 1915.

Published every morning and evening in the Japanese language including Sundays.

Circulation: 6,500, of which 60% is circulated locally and 40% is sent to outports.

Number of pages: 2 sheets, 4 pages to each sheet.

Size of type-page: 15” × 20”.

Number and size of columns: 12 columns to a page, each column measuring 15” × 1.7”.

Publishers' Remarks: This publication is for the development of the people's culture. It publishes twice daily, once in the morning and once in the afternoon. Occasionally it issues feature pages. It has special correspondents in many important cities throughout China and abroad. It is equipped with the latest rolling machinery and can print 20,000 copies in an hour. It uses mats and is fully equipped with all necessary machinery for the printing of newspapers.

---

**PING MIN JIH PAO**

**TSINAN**

Established since 1921, it is now the largest privately-owned Chinese newspaper in the Province of Shantung.

It holds an unbiased policy and leads all other publications in the district in circulation.
SHENSI PROVINCE

SHENSI covering an area of 75,290 square miles was the early home of the Chinese race. The population is 17,222,571, the density being 228 per square mile.

Shensi is surrounded by seven provinces. The Great Wall divides the Province from Suiyuan in the north; in the west are Ninghsia and Kansu; Szechwan and Hupeh form the southern boundary, and Honan and Shansi are the neighbouring provinces in the east.

Subject to fierce dust storms in the winter and rain storms in the summer, the northern section is both dry and cold, whereas the climate in the south is more moist and becomes extremely hot in summer.

As this province has no railways, roads and rivers are the only means of transportation. Important roads from Kansu, Shansi, Honan, Hupeh and Szechwan all terminate at Sian, provincial capital of the Province. Running from Yulin to Sian is a good road, by which wool, hides and other products from Suiyuan Province are brought down. The Wei-ho is navigable for barges of shallow draft.

Shensi is a high, loess-covered plateau with lofty mountain ranges. In the river valleys, where irrigation is possible, such as the Wei-ho and Han-kiang, splendid crops are raised. Elsewhere, due to lack of rain, a fair harvest is gathered only once in three years. The principal crops are cotton, wheat, vegetables, millet, hemp, fruit, tiny oil and trees, from which gum, resin and varnish are obtained.

There are many flocks of sheep and herds of cattle, and by improving the stock, ranching can be made very profitable even in the dry lands.

Difficulty of transportation has prevented the development of Shensi's rich coal and iron fields. Sulphur is mined and petroleum is found near Yenchang. Gold, nickel, marble, and salt are other minerals found in the Province.

SIAN (西安) the name of which has been recently changed back to Changan, its ancient one, is situated on a great plain some ten or twelve miles south of the Wei-ho and is the capital of the province. Historically, Sian is of great interest. From 206-605 A.D. the city was known by its present name, Changan, and was the capital of the Chinese Empire. Under
the Tang Dynasty (618-919 A.D.) the city was prosperous and known as Siking. The walls that surround Sian are thirty feet high, and were built by Hungwu, the founder of the Ming Dynasty (1368-1662 A.D.). The watch towers built at intervals along the walls, were completed a hundred and fifty years later. Like most Chinese cities, Sian had its Chinese and Tartar cities divided by an inner wall, but the Tartar city was completely destroyed in 1911 and all its inhabitants were massacred. In a temple known as the Pelling, south of the city, is a collection of over one thousand tablets, called the Forest of Stones. On some of these tablets the history of the city has been inscribed. The most famous scene is the Nestorian Tablet dated 781 A.D., which records the entry of the Nestorian Christians from Western Asia into Sian. To-day the city is important as a trading centre and as the junction of several main roads. When the Lung-Hai Railway was built, the city should open up as a manufacturing and tourist centre.

The publication furnishes good material. It has sales agents at all important cities.

PERIODICAL

CHIEN SHEH CHOU KAN (Construction Weekly Publication)

Established April, 1929.
Published every week in the Chinese language by the Construction Bureau of Shensi Province.

Circulation: 300, of which 30% is circulated locally and 70% is sent to outports.
Number of pages: 27.
Size of type-page: 5” × 8”.
Number and size of columns: 1 column.
Publisher's Remarks: This publication is not for sale; it circulates among all government offices with which it has connections.

Read the

SIN CHIN JIH PAO

Established 1921
(The New Shensi Daily News)

"Go to the Northwest!" say the Government officials who are directing the attention of the people to the development of the northwestern provinces with Shensi as the center.

Read the NEW SHENSI DAILY NEWS, the authority on subjects of Northwest China. Its circulation is nationwide, covering all the northwestern provinces.

Subscription Rate: Mex.$1.00 per month.

ADVERTISING RATES UPON APPLICATION.

SIN CHIN JIH PAO

Chungshan Road, Sian, Shensi, China
SUIYUAN PROVINCE

SUIYUAN was formerly the western part of Inner Mongolia. Its north is bounded by Outer Mongolia; on the east is Chahar; its southern boundary is formed by the two provinces of Shansi and Shensi, with the Great Wall as the border line; Ninghsia is the neighbouring province in the west. Kweisui is the provincial capital.

The famous Gobi Desert, about half a mile above sea level, covers part of its northern section. The climate is one of extremes and rather dry.

The Peiping-Suiyuan Railway runs as far west as Paotow, which is situated on the northern bank of the Hwang-ho, and is one of the most important trading centres in China’s Great Northwest. This railway will finally be extended to Ninghsia, capital of Ninghsia Province, serving as an outlet for Mongolian products, such as oxen, sheep, wool, camel hair, and skins of wild animals.

The Hwang-ho, or Yellow River, runs through the Province like a sharp curse, thus rendering the adjoining land remarkably fertile and productive.

Mongols consider live stock to be their only important property; large herds of cattle, sheep, camels and horses are found in the surrounding steppes. The average Mongolian family is said to own fifty sheep, twenty-five horses, fifteen cattle and ten camels.

The Mongols are famous horsemen. They are all Buddhists of the “Yellow” church.

Being attracted by the great fertility of the land, Chinese immigrants are increasing in numbers and wealth year by year.

The mineral wealth of Mongolia is unexplored, but coal, silver, and graphite have been found.

KWEISUI (錫 chilled) is a trading market of prime importance in the south of Suiyuan. It is on the Peiping-Suiyuan Railway. Besides, it has a number of trade routes extending into Outer Mongolia, and southward to the Great Wall and the Hwang-ho.

The surrounding steppes serve as pasturage for large herds of cattle, sheep, camels and horses.
SUIYUAN MIN KUO JIH PAO
(Suiyuan Republican Daily News) (新民國報)
Established 1927.
Published daily in the Chinese language.
Circulation: 1,500, of which 50% is circulated locally and 50% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 14" × 19½".
Number of columns: 11 columns, each measuring 14" × 1½".

SUIYUAN SHIEH HWEI JIH PAO (Suiyuan Social Daily News) (新社會報)
Established October, 1928.
Published daily in the Chinese language by the Suiyuan Social Bureau.
Circulation: 1,000, of which 40% is circulated locally and 60% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Number of columns: 6.
Size of column: 10" × 2½".
SZECHWAN PROVINCE

SZECHWAN is a mountainous and hilly province, with an area of 166,000 square miles, double the size of the United Kingdom. There is no official census of the population; the estimated figure is about 48,000,000.

It is bounded on the north by Kansu and Shensi; to the east a mountain range divides off Szechwan from Hupeh and Hunan; the Yangtze only forms a fraction of the southern boundary between the Province and Yunnan. The new Province of Sikong lies to the west of Szechwan.

In spite of the dangerous gorges of the Yangtze regular steamer service is maintained on the River, which serves as the main arterial road of the Province. The Shanghai-Chungking return trip can be made in seven or eight days.

The majority of the roads of Szechwan are paved with flagstones, excellent for transport by man and pack animals especially in rainy weather. One important motor road connects Chungking with Chengtu, capital of the Province.

Chungking is the terminus of the air route from Shanghai by way of Hankow. A service twice a week on Wednesdays and Saturdays links these two cities together on the upper Yangtze.

The soil is so fertile that any crop grown in China can be raised here with success. Rice, the staple food of the natives, is cultivated and sugar is extensively grown. Among other the most important products of the Province are tobacco, cotton, hemp, ramie, vegetable agricultural products are tobacco, cotton, hemp, ramie, vegetable tallow, rhubarb, indigo, beans, wheat and cereals, medicinal plants, and fruits.

Szechwan is very rich in mineral wealth. Coal, copper, silver, gold, petroleum, antimony, lead, zinc, sulphur, saltpeter, kyspur, nitrates, jade, mica, and asbestos all exist in paying quantities, but none of them are extensively mined.

The following countries have consular representatives established at Chungking: America, France, Germany, Great Britain and Japan.
CHENGDU (成都), the capital of the Province, is in a fertile plain, where rice, silk, china grass (ramie), groundnuts, and tobacco are the principal crops. The Chengtu Plain is well irrigated; the system employed is said to be 2,000 years old. In the southwest section of the city stands the old palace quarter, where the Emperors of the Minor Han Dynasty resided. The palace walls are now in ruins and there is little left to remind one of the historical past of the city. Its reputation as the home of literary men and statesmen is due to Chu Ko-liang and Tu Tzu-mei; the former was a statesman who assisted Liu Pi in the restoration of the Han Dynasty, and the latter was a patriotic poet of the eighth century. In Chengtu are the residential quarters of the Governor of the Province.

CHENGDU KUO MIN JIH PAO (Chengtu Republican Daily News) (成都國民日報)
Established April, 1928.
Published daily in the Chinese language including Sundays.
Circulation: 5,000.
Number of pages: 2 sheets of 4 pages each.
Size of type-page: 15" × 19".
Number and size of columns: 10 columns, each measuring 15" × 13/4".

CHENGDU MIN TSZE JIH PAO (Chengtu Clarifying Facts Paper) (成都明史日報)
Established Oct., 1921.
Language: Chinese.
Published daily.
Circulation: 5,500; 80% local.
Number of pages: 4.
Number of columns: 7.
Size of column: 9" × 1¾".
Supplement: Min Tsze Monthly.

CHUEN PAO JIH KAN (Szechwan Daily News) (川聰日報)
Established October, 1912.
Published every morning in the Chinese language including Sundays.
Circulation: 20,000, of which 30% is circulated locally and 70% is sent to outports.
Number of pages: 3 sheets, 4 pages to each sheet.
Size of type-page: 19" × 14".
Number and size of columns: 10 columns, each measuring 14" × 1¾".
Feature pages:
Supplement every Monday.
Supplementary edition every evening.
Publishers' Remarks: After amalgamation and reorganization, the circulation of this paper has grown rapidly. It publishes also an evening edition.

SIN SIN SIN WEN (Sin Sin Daily News) (新新新日報)
Established Sept. 1929.
Language: Chinese.
Published daily.
Circulation: 5,700; 30% outport, 70% local.
Number of pages: 8.
Size of page: 13" × 9½".
Supplement on all national memorial days in the year.
Publishers' Remarks: Owing to civil war, paper supplies are scarce, so a reduction from 8 to 6 pages has been made for the time being.
CHUNGKING (重慶) another name for Bahsien, lies at the confluence of the Kialing River and the Yangtze, 1,400 miles from Shanghai. The port was opened to foreign trade in March, 1891. It is a large commercial city, now the most important trade emporium of Western China; its first rise to importance was as a salt exporting port. Besides serving as the exporting port for Szechwan Province it is also used for exporting goods via the provinces of Kweichow, Chinghai and southern Kansu. The city is surrounded by a hundred foot wall. The junk traffic that passes through the port is enormous, as Chungking is the entrepot for junkers coming from inner Szechwan and from the adjoining provinces of Hupeh, Hunan, Yunnan, and Kweichow. Part of the city is now electrified. Flour mills are established in the city and there are several other local industries. There is a difference of 100 feet between the average maximum and minimum levels of the Yangtze at this city.

CHIA LING KIANG JIH PAO (Chia Ling River Daily News) (嘉陵江日報)
Established March, 1928.
Published daily in the Chinese language including Sundays.
Circulation: 500; of which 20% is sent to outports.
Number of pages: 2 pages.
Size of type-page: 9" × 11".
Number and size of columns: 4 columns to a page, each column measuring 9" × 3½".

CHUNGKING SHANG WU JIH PAO (The Chungking Commercial Daily News) (重慶商報)
Established April, 1914.
Published daily in the Chinese language.
Circulation: 7,000; of which 50% is circulated locally and 50% is sent to outports.
Number of pages: 3 sheets, 4 pages to each sheet.
Size of type-page: 13¼" × 19½".
Number and size of columns: 10 columns to a page, each column measuring 13¼" × 2½".

CHUNGKING WAN PAO SHIEH (The Chungking Evening News) (重慶晚報)
Established October, 1928.
Published every evening in the Chinese language including Sundays.
Circulation: 5,000; of which 80% is circulated locally and 20% is sent to outports.
Number of pages: 2 pages.
Size of type-page: 8" × 13".
Number and size of columns: 4 columns to a page, each column measuring 8" × 3".

HSINFAN (新繁) about 27 miles north of Chongtu, is in a fertile plain, well-watered. Rice is its chief produce.

PENGAN (蓬安) lies to the west of Kialing Kiang—a city of some importance.

SANTAI (三台) is in the middle of the province, standing on the left bank of the Fu-kiang.

PERIODICALS

HSUEN LIAN CHOW KAN (Training Weekly) (訓練志周)
Established 1932.
Published weekly in the Chinese language.
Circulation: 2,500.
SHANG TSE CHOW KAN (Strong Will Weekly) (雪志志月)
Established 1932.
Published weekly in the Chinese language.
Circulation: 4,000.

SHWANGLIU (双流) 20 miles southwest of Chengtu, is also on the table-land which is 2,000 square miles in area.

SHWANGLIU JIH KAN (Shwang-liu Daily News) (双流日刊)
Established October, 1931.
Published daily in the Chinese language.
Circulation: 300, of which 50% is circulated locally and 50% is sent to outports.
Number of pages: 3 sheets of 3 pages.
Size of type-page: 20" x 12".
Number and size of columns: 3, each measuring 20" x 4".

TACHU (大竹) is a market town of some importance in the eastern part of the mountainous region. A highway runs east and west to connect the neighbouring important cities.

TACHU HSIEH CHENG CHOW KAN SHIEH (Tachu District Administration Weekly) (大竹縣政事周報)
Established May, 1930.
Published weekly in the Chinese language by the Tachu District Government.
Circulation: 800, of which 70% is circulated locally and 30% is sent to outports. Not for sale.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 8½" x 13".
Number and size of columns: 8 columns in a page, each column measuring 8½" x 1½".

TIENKIANG (墾江) lies to the west of the Kao Tai Ho, or High Bank River, a tributary stream of the Yangtze.

TIENKIANG HSIEH CHOW KAN (Tienkiang Weekly) 墾江縣星期)
Established August, 1929.
Published weekly in the Chinese language.
Circulation: 600, of which 20% is circulated locally and 80% is sent to outports.
Number of pages: 2 sheets of 4 pages.
Size of type-page: 9" x 13".
Number and size of columns: 3 columns in a page, each column measuring 9" x 4½".

WANHSIEN (巫縣) is the first great river port in Szechwan, above the Yangtze gorges.

WANHSIEN JIH PAO (Wanhsien Daily News) (巫縣日報)
Established 1931.
Published daily.
Circulation: 800.
Number of pages: 4.
Size of type-page: 13" x 18".
Number of columns: 8.
The vast, mountainous table-land of Yunnan slopes from an elevation of 15,000 feet in the northwest to 5,000 feet in the south. It has an extensive area of 108,000 square miles, with a population of 11,020,591.

Burma forms the western frontier; south of the Province is the Province of Tongking of French Indo-China; Kwangsi and Kweichow are the two provinces on the eastern frontier and the upper Yangtze, known as the Chinsha here, divides Yunnan from Szechwan and Tibet in the north.

Yunnan enjoys almost constant sunshine, in contrast to the dampness and fogs of Szechwan. This province being situated in the high lands the climate is dry and the winds are strong.

Kunming, the capital, is the hub of all trade routes. A road runs to Tali, where it branches into separate roads leading to Mandalay. A north road goes to Szechwan Province and the northeastern to Kweiyang in Kweichow Province, passing through the mountainous country.

The Yunnan Railway, starting from Haiphong on the coast of the Gulf of Tongking, enters the Province at Laokay and connects the capital, covering a distance of 300 miles. This is the important means of transportation in the Province.

In spite of the dryness of the climate, many streams make irrigation possible for farming. In the northwest there are valuable forests and much grazing land; the chief crops are wheat, corn, and barley. Elsewhere in Yunnan rice, millet, corn, beans, and tobacco are the chief crops; cotton, sugar, camphor, hemp, rape, sesame, and tea are also grown.

The mineral wealth is great. There is an abundance of coal but no demand for it as yet. Iron is mined in every district. Yunnan is one of the richest copper districts in the world. Five groups of mines in the Tungchuan area have been worked under government supervision for two hundred years. Gold is found in the river beds; silver is mined in many places. The Kochin tin mines near Mengtze supply four and one half per cent of the world's tin. Quicksilver, antimony, zinc, and orpiment are also mined.

The following have representatives stationed at Kunming: America, consul; France, consul and vice-consul; Great Britain, consul.
KUNMING (昆明) its old name being Yunnanfu, situated on a fertile plain, is the capital of the Province. The city consists of two parts. The inner city is surrounded by a wall and with the growth of importance of the city an outer city has been built outside the city walls. The foreign settlement is in the southern suburb of the outer city, and came into existence with the opening of the Yunnan Railway Kunming has witnessed several Mohammedan rebellions, and during the Mohammedan war (1856-72) the city withstood three sieges, and these troubles depopulated the city. An aviation military college, government offices, schools and a wireless station are established here. Peaches grown in the district are noted for their fine flavour.

SHE HWEI SIN PAO (The Society News) (社會新聞)
Established November, 1916.
Published every morning in the Chinese language except Sundays.
Circulation: 3,000.
Number of pages: 1 and a half sheets—6 pages.
Size of type-page: 12 ½ x 20”.
Number and size of columns: 6
Columns, each column measuring 12 ½ x 3 ½”.

SI XAN JIH PAO (Southwest Daily News) (西北日報)
Established November, 1921.
Published every morning in the Chinese language except Mondays.
Circulation: 5,000, of which 50% is circulated locally and 50% is sent to outports
Number of pages: 2 sheets, 4 pages to each sheet.
Size of type-page: 14” x 19 ½”.
Number and size of columns: 8 columns in a page, each column measuring 14” x 2 ½”.
Publishers’ Remarks: This publication is circulated through-out the Inner China and the South Sea Islands, and is the leading paper in Yunnan Province.

YEE SHENG JIH PAO (Heroic Voice Daily Press) (義聲日報)
Established May, 1912.
Published every morning in the Chinese language including Sundays.
Circulation: 6,500, of which 70% is circulated locally and 30% is sent to outports.
Number of pages: 1 sheet of 4 pages.
Size of type-page: 13” x 20”.
Number and size of columns: 5 columns in a page, each column measuring 13” x 4”.
Publishers’ Remarks: This publication supports the principles of Dr. Sun Yat-sen. Its news are accurate and fast and its circulation is very extensive.

YUNNAN MIN SUN JIH PAO (Yunnan People’s Daily) (雲南民聲日報)
Language: Chinese.
Published daily except Sundays.
Circulation 3,000; 70% outport, 30% local.
Number of pages: one sheet of 4 pages.
Number of columns: 4.
